

2019 Active Transportation Program Large Infrastructure Scoring Rubric

The California Transportation Commission (CTC) has prepared these Scoring Rubrics in coordination with Caltrans to provide additional guidance on the evaluation process. This document is principally intended as a guide for the evaluators when scoring the 2019 ATP applications. Applicants may also find this a useful resource when developing applications. This document, however, is not intended as the definitive formula for how applications will be scored. Evaluators may take other factors into consideration when scoring applications, such as the overall application quality, project context and project deliverability.

Note: For combined projects the term “project” refers to both the infrastructure and non-infrastructure elements.

Index:

QUESTION #1:	Disadvantaged Communities	Page 2
QUESTION #2:	Potential to Increase Users	Page 6
QUESTION #3:	Potential to Reduce Collisions	Page 10
QUESTION #4:	Public Participation & Planning	Page 16
QUESTION #5:	Context Sensitive/Innovation	Page 20
QUESTION #6:	Transformative Projects	Page 22
QUESTION #7:	Cost Effectiveness	Page 23
QUESTION #8:	Leveraging Funds	Page 24
QUESTION #9	Scope & Plan Consistency	Page 24

2019 Active Transportation Program Large Infrastructure Scoring Rubric

QUESTION #1: DISADVANTAGED COMMUNITIES (0-10 POINTS)

This project does not qualify as a Disadvantaged Community.

If this project does not qualify as a Disadvantaged Community, applicant will skip the question and move onto question 2.

Special Instructions & Expectations for Evaluators:

If the applicant checked the box for “This project does not qualify as a Disadvantaged Community” the evaluator will not evaluate sub-questions C, D and E. The score for Question #1 will be zero “0” if the box is checked.

A. Map of Project Boundaries, Access and Destination (0 points): Required

Provide a scaled map showing the boundaries of the proposed project, the geographic boundaries of the disadvantaged community, and disadvantaged community access point(s) and destinations that the project is benefiting.

B. Identification of Disadvantaged Community: (0 points)

Select one of the following 4 options. Must provide information for all Census Tract/Block Group/Place # that the project affects.

- *Median Household Income*
- *CalEnviroScreen*
- *Free or Reduced Priced School Meals - Applications using this measure must demonstrate how the project benefits the school students in the project area.*
- *Other*

C. Direct Benefit: (0 - 4 points)

1. *Explain how the project closes a gap, provides connections to, or addresses a deficiency in an active transportation network or meets an important community need.*
2. *Explain how the disadvantaged community residents will have physical access to the project.*
3. *Illustrate and provide documentation how the project was requested or supported by the disadvantaged community residents. Provide documentation of how the local residents and community groups were engaged for input on community and household needs and of any support from local community based organizations and/or residents.*

Special Instructions & Expectations for Evaluators:

Sub-questions A & B do not receive any points.

- If the applicant does not check the box “This project does not qualify as a Disadvantaged Community” they are required to provide the required project map(s) and provide the DAC information as required in both A & B.
- The evaluator should verify that the required information in both A & B is provided and complete. If the evaluator determines the information is incomplete, inconsistent, or has been manipulated to maximize the DAC criteria they should note this in their evaluation comments and score Question 1 accordingly.

When evaluating the first part of sub-question C, “Explain how the project closes a gap, provides connections to, or addresses a deficiency in an active transportation network or meets an important community need,” the evaluator should consider:

- Does the project provide reasonable improvements to close missing gaps; increases needed routes or connections (such as access to and/or community safety for disadvantaged community residents to parks, greenways, open space, health care centers, transit stops, and other community assets) or addresses the poor conditions of an existing route.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

- If developing a new route/connection, will the project result in a convenient and logical route that residents will want to use because it offers improved access to destinations the community commonly utilizes.
- Will the project address the lack of or need for active transportation planning? And/or does the project address the community concerns about the lack of pedestrian or bicycle safety education in their community.
- Will the project address an identified “need” that was identified by the local community and is supported by backup documentation/attachments?

When evaluating the second part of sub-question C, “Explain how the disadvantaged community residents will have physical access to the project/program,” the evaluator should consider:

- Will the improvements will be physically convenient and safe for the community to access or use?
- Will the improvements provide a logical route that residents will use or want to use because it offers safe and convenient access?
- If the project will be conducted within the local DAC community, will the DAC residents be specifically targeted to participate in the process?

When evaluating the third part of sub-question C, “Illustrate how the project was requested or supported by the disadvantaged community residents,” the evaluator should consider:

- Was the local DAC community actively involved in the project development?
- Did the DAC community have the opportunity to provide their input to the community needs and do they support this project?
- Was this project presented to the DAC community in a local forum so that they could provide input or support? Or, was the project simply voted upon in a general agency meeting without really reaching out to the community to learn their needs and wants?

Points	Applicant’s ability to demonstrate the project will result in a direct benefit to the Disadvantaged Community.
4 Points	<p>The application <u>clearly and convincingly:</u></p> <ul style="list-style-type: none"> • Explains how the project closes a gap, provides connections to, or addresses a deficiency in an active transportation network or meets an important community need, <u>AND</u> • Explains how the disadvantaged community residents will have physical access to the project, <u>AND</u> • Illustrates and documents how the project was requested or supported by the disadvantaged community residents.
3 Points	<p>The application <u>convincingly:</u></p> <ul style="list-style-type: none"> • Explains how the project closes a gap, provides connections to, or addresses a deficiency in an active transportation network or meets an important community need, <u>AND</u> • Explains how the disadvantaged community residents will have physical access to the project, <u>AND</u> • Illustrates how the project was requested or supported by the disadvantaged community residents.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

2 Points	<p>The application <u>somewhat:</u></p> <ul style="list-style-type: none"> Explains how the project closes a gap, provides connections to, or addresses a deficiency in an active transportation network or meets an important community need <u>AND</u> Explains how the disadvantaged community residents will have physical access to the project, <u>AND</u> Illustrates and documents how the project was requested or supported by the disadvantaged community residents.
1 Points	<p>The application <u>minimally:</u></p> <ul style="list-style-type: none"> Explains how the project closes a gap, provides connections to, or addresses a deficiency in an active transportation network or meets an important community need, <u>AND</u> Explains how the disadvantaged community residents will have physical access to the project, <u>AND</u> Illustrates and documents how the project was requested or supported by the disadvantaged community residents.
0 Points	Evaluators can award a score of zero if they believe the application does not adequately make a convincing argument that the project will directly benefit a disadvantaged community.

D. Project Location: (0 - 2 points)

Is your project located within a disadvantaged community?

Special Instructions & Expectations for Evaluators:

Evaluators should review the project location maps that are required with the application to determine the accuracy of the applicant's response to the project location question.

- If the applicant failed to provide project location maps that clearly define and show all of the proposed projects locations, and the corresponding census tract/block/place data that verifies the DAC community location status, the evaluator should not give full points for this sub-question and should use their best judgment to choose the score they feel best represents the information given.

Points	Applicant's ability to demonstrate the project is located within a DAC
2 Points	Project location(s) are/is <u>fully</u> (100%) located within a DAC.
1 Point	Project location(s) are/is <u>partially</u> (less than 100%) within a DAC.
0 Points	None of the project location(s) are/is within a DAC.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

E. Severity: (0-4 points)

Points	Median Household Income (MHI) Criteria – MHI = \$51,026
1 Point	75% through <80% of MHI \$47,836.50 through \$51,025.59
2 Points	70% through <75% of MHI \$44,646.49 through \$47,835.99
3 Points	65% through <70% of MHI \$41,458.30 through \$44,646.48
4 Points	< 65% of MHI less than \$41,458.30
Points	CalEnviroScreen Criteria
1 Point	20% through 25% most disadvantaged
2 Points	15% through < 20% most disadvantaged
3 Points	10% through < 15% most disadvantaged
4 Points	< 10% most disadvantaged
Points	Free or Reduced Lunches
1 Point	≥ 75% through 80% of students receive free or reduced lunches
2 Points	> 80% through 85% of students receive free or reduced lunches
3 Points	> 85% through 90% of students receive free or reduced lunches
4 Points	> 90% of students receive free or reduced lunches

Points	Other DAC Criterion
Use MHI Criteria Severity Scoring Above	If a project applicant believes a project benefits a disadvantaged community but the project does not meet the aforementioned criteria due to a lack of accurate Census data or CalEnviroScreen data that represents a small neighborhood or unincorporated area, the applicant must submit for consideration a quantitative assessment, to demonstrate that the community's median household income is at or below 80% of that state median household income.
TBD	Regional definitions of disadvantaged communities as adopted in a Regional Transportation Plan (RTP) by an MPO or RTPA per obligations with Title VI of the Federal Civil Rights Act of 1964, such as "environmental justice communities" or "communities of concern," may be used in lieu of the options identified above.
4 Points	Projects located within Federally Recognized Tribal Lands (typically within the boundaries of a Reservation or Rancheria).

2019 Active Transportation Program Large Infrastructure Scoring Rubric

QUESTION #2: POTENTIAL FOR INCREASED WALKING AND BICYCLING, ESPECIALLY AMONG STUDENTS, INCLUDING THE IDENTIFICATION OF WALKING AND BICYCLING ROUTES TO AND FROM SCHOOLS, TRANSIT FACILITIES, COMMUNITY CENTERS, EMPLOYMENT CENTERS, AND OTHER DESTINATIONS; AND INCLUDING INCREASING AND IMPROVING CONNECTIVITY AND MOBILITY OF NONMOTORIZED USERS. (0-38 POINTS)

A. Describe the issues that this project will address. How will the proposed project benefit the non-motorized users? What is the projects desired outcome and how will the project best deliver that outcome? (0-19 points)

Breakdown of points:

- “Need” must be considered in the context of the “Potential for increased walking and bicycling”
- “Need” must be considered in the context of one or more of the following:
 - Connectivity to key destinations
 - Mobility to access everyday needs and services
 - Local public health concerns
- To receive the maximum points, applicants must demonstrate all of the above aspects of “need”.

Special Instructions & Expectations for Evaluators:

The following checks and analysis must be done by the evaluator prior to awarding points:

- Review the data provided for reasonableness from the proposed project.
 - In doing this the evaluator should consult the attached photos, Google Maps, and any other information available to make an informed decision. A project does not need to have, or create large numbers in order to cause great change to a community’s active transportation increases, and this can be reflected in the scores given to a project.
- Evaluate the level to which the applicant demonstrated the need for improvements in the project area.
 - Did the applicant identify specific local public health concerns, health disparity, and/or conditions in the built and social environment affecting the project community that can be addressed by increasing walking and biking, including:
 - ❖ Thorough and nuanced discussion of existing health condition(s) amongst targeted users AND
 - ❖ Responses should be more sophisticated than simply stating, “Walking and biking is good for health because it increases physical activity.” AND
 - ❖ The physical or social conditions (known as the social determinants of health) in the target community that contribute to the current health conditions (beyond other elements already addressed in the application including bike/ped. infrastructure gaps and barriers, collision rates, etc.) AND
 - ❖ Description and supporting data of the social determinants of health including, but not limited to, access to safe places for recreational activities, access to essential destinations (like childcare and work), tree canopy, and social cohesion AND
 - Provides local public health data demonstrating the above public health concern or health disparity, including:
 - ❖ Inclusion of health data at the smallest geography available (i.e., census track or possibly county level if census track is not available) AND
 - ❖ Health status of targeted users given as percentages or rates using relevant and local health indicators AND stated as ranks or comparisons to non-targeted user data (e.g., the community has a higher/lesser obesity rate compared to both the state and other rural communities of similar size) AND
 - ❖ Citation of sources used for all health status information given.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

Points	Applicant's ability to demonstrate a specific active transportation need.
14-17 Points	The application <u>clearly and convincingly demonstrates "need" in the project area</u> , and documents <u>all</u> of the following: <ul style="list-style-type: none"> • the lack of connectivity, • the lack of mobility for non-motorized users, • local health concerns, <u>AND if applicable</u> • For NI components- education, encouragement and/or enforcement
9-13 Points	The application <u>convincingly demonstrates "need" in the project area</u> , and documents: (at least 2 of the following) <ul style="list-style-type: none"> • the lack of connectivity, • the lack of mobility for non-motorized users, • local health concerns, <u>AND if applicable</u> • For NI components- education, encouragement and/or enforcement
4-8 Points	The application <u>somewhat demonstrates "need" in the project area</u> , and documents: (at least 1 of the following) <ul style="list-style-type: none"> • the lack of connectivity, • the lack of mobility for non-motorized users, • local health concerns <u>AND if applicable</u> • For NI components- education, encouragement and/or enforcement
1-3 Points	The application <u>minimally demonstrates "need" in the project area</u> , and documents: (partially 1 or more of the following) <ul style="list-style-type: none"> • the lack of connectivity, • the lack of mobility for non-motorized users, • local health concerns <u>AND if applicable</u> • For NI components- education, encouragement and/or enforcement
0 Points	The application <u>does not demonstrate "need" in the project area</u>

PLUS:

Points	Applicant's ability to demonstrate the active transportation needs of STUDENTS.
2 Points	The application addresses the active transportation needs of students
0 Points	The application does not address the active transportation needs of students

***B. Describe how the proposed project will address the active transportation need:
(0-19 points)***

Breakdown of points:

- **"Need"** must be considered in the context of the "Potential for increased walking and bicycling"
- **"will address"** must be considered in the context of one or more of the following "needs":
 - the lack of connectivity,
 - the lack of mobility for non-motorized users,
 - local health concerns

2019 Active Transportation Program Large Infrastructure Scoring Rubric

- To receive the maximum points, applicants must demonstrate all of the above aspects of “need”.
- The amount of points an applicant/project receives on this sub-question is **not impacted by the number of categories** documented for addressing the active transportation need.
 - An application only documenting one category has the potential of receiving full points as long as it can fully meet the scoring criteria. It is up to the applicant to demonstrate that additional categories are not appropriate for the project to better or more fully address the need.
 - An application documenting numerous categories should not automatically receive additional points. It is up to the applicant to demonstrate that the project scope connected to each category is relevant to the non-motorized users’ needs in the project limits.

Special Instructions & Expectations for Evaluators:

A “very important destination” includes those that offer access to goods, services and activities that society considers particularly important i.e. a hospital, a grocery store, a transit station, or an employment center (where the community can reasonably expect to find employment). The applicant may be able to make a case for other very important destinations, with adequate documentation.

The following checks and analysis must be done by the evaluator prior to awarding points:

- Evaluate if the proposed improvements are the best solution to address the need(s) described in sub-question A.
- Evaluate if the destinations shown in the application are reasonably accessible by non-motorized users.
- Determine if an increase in active transportation modes can be realized by the project.
- Determine if the local public health department and/or local non-profit that provides support for health equity/addressing health disparities
 - was involved in aspects of the application such as supporting public engagement, developing project scope, supporting data and statistics to highlight the public health need, etc. AND
 - will continue to be engaged in the implementation of the project/program.
- Evaluators should award fewer points if the local public health department and/or local non-profit that provides support for health equity/addressing health disparities was just contacted for data or information, but not involved in a meaningful way in project development otherwise, or if the applicant did not contact the local public health department.

Points	Applicant’s ability to make a case that the project will address need for active transportation.
15-18 Points	<p>The application <u>clearly and convincingly demonstrates</u> that the <u>project will best result in meaningful increases</u> in the number (and/or percentage for rural/small communities) of walking and bicycling users in the project area by:</p> <ul style="list-style-type: none"> • creating or improving links or connections, • encouraging use of routes to very important destinations and community identified destinations.
10-14 Points	<p>The application <u>convincingly demonstrates</u> that the <u>project will likely result in meaningful increases</u> in the number (and/or percentage for rural/small communities) of walking and bicycling users in the project area by:</p> <ul style="list-style-type: none"> • creating or improving links or connections, • encouraging use of routes to very important destinations and community identified destinations.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

5-9 Points	<p>The application <u>somewhat demonstrates</u> that the <u>project will likely result in minor meaningful increases</u> in the number (and/or percentage for rural/small communities) of walking and bicycling users in the project area by: (at least 1 of the following)</p> <ul style="list-style-type: none"> • creating or improving links or connections, • encouraging use of routes to very important destinations and community identified destinations.
1-4 Points	<p>The application <u>minimally demonstrates</u> that the <u>project may result in some minor increases</u> in the number (and/or percentage for rural/small communities) of walking and bicycling users by: (partially 1 or more of the following)</p> <ul style="list-style-type: none"> • creating or improving links or connections, • encouraging use of routes to very important destinations and community identified destinations.
0 Points	The application did not demonstrate the project would address the need.

PLUS:

Points	Applicant's ability to make a case that the proposal that will increase the number of active transportation trips accomplished by STUDENTS.
1 Point	The project will increase the proportion of active transportation trips accomplished by students
0 Points	The project will not increase the proportion of active transportation trips accomplished by students

2019 Active Transportation Program Large Infrastructure Scoring Rubric

QUESTION #3: POTENTIAL FOR REDUCING THE NUMBER AND/OR RATE OR THE RISK OF PEDESTRIAN AND BICYCLIST FATALITIES AND INJURIES, INCLUDING THE IDENTIFICATION OF SAFETY HAZARDS FOR PEDESTRIANS AND BICYCLISTS. (0-20 POINTS)

A. Describe the project location's history of pedestrian and bicycle collisions resulting in fatalities and injuries to non-motorized users, which this project will mitigate. (10 points max)

Breakdown of points:

The amount of points an applicant/project receives on this sub-questions is based on the evaluators review of the following output files from the new UC Berkeley SafeTREC TIMS ATP tool (or if the agency prefers, they may use their own collision database data/software to produce equivalent documents).

- The “County/City Heat Map” and the “Community Heat Map” of the area surrounding the project limits: Points are based on the maps demonstrating that the relative collision history within the project limits is high when compared to the overall jurisdiction/community's collision history, suggesting that the project limits represents one of their highest safety needs.
- Project Area Collision Map: Points are based on the map demonstrating that the past collision locations are within the “**Influence area**” of the proposed safety improvements. Evaluators should consider the overall project limits AND the limits of the specific improvements/scope of the project.
- Collision Summaries and collision lists/reports: Points are based on summaries, lists and reports demonstrating the overall number of collisions and that collision trends, collision types, and collision details will be positively impacted by the proposed safety improvements.
 - ❖ Note: For applications that do not have the collision data OR that prefer to provide safety data in a different format are allowed to do so. If an application chooses not to provide the above output documents, then the evaluator must scrutinize why they did not provide these documents/data and then do their best to make an approximation/comparison of the data provided to the generally-expected output data.

***6 points:** Based on applicant's ability to make a compelling case that the history of crash data (or Safety Data for projects without documented crash data) within project location represents one of the agency's top priorities for addressing ongoing safety and demonstrates the need for safety improvements.*

Special Instructions & Expectations for Evaluators:

Applicants are **required** to respond to question **1 or 2**, and have the **option** to respond to **both**.

Sub-questions 1 and/or 2 and 3 do not receive any points. The evaluator should verify that the required information in 1 and/or 2 and 3 is provided and complete. If the evaluator determines the information is incomplete, inconsistent, or has been manipulated they should note this in their evaluation comments and score sub-question 4 accordingly.

The following “Minimum Requirements” must be met for the application to receive any of these points:

- Applicant must provide the output files from the new TIMS ATP tool (or if the agency prefers, they may use their own collision database data/software to produce equivalent documents)
- The output files provided by the Applicant must meet the following parameters:
 - The project's “Influence area”, as defined by the applicant and shown in the output documents, must be consistent with the project maps/plans attached to the application AND must be reasonable per the “Influence area” guidance below.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

- Evaluators should consider additional point reductions for this question if the applicant included crash data that does not reasonably tie to the influence area of the proposed “safety” improvements.
- The collisions represent the most recent 5-11 years of available crash data. (Note: SWITRS and TIMS crash data is typically 1.5 to 2.5 years old before it is loaded into the crash database).
- If the applicant does not use the TIMS ATP tool and instead uses their own collision database data/software, then the following additional checks and analysis must be done by the evaluators prior to awarding points:
 - Crashes are from official crash reports. The full crash reports do not have to be included, but their report number and agency must be identifiable.
 - Only pedestrian and bicycle crashes are included. All crashes that do not include a non-motorized user as one of the primary victims must be excluded.
 - The number of crashes entered into the table is directly supported by both the map and the listing.
- The data entered in the application-table is accurate and reflects the documentation the applicant provides abiding to the above requirements.

A project’s expected safety “Influence Area” (i.e. where a project has the potential to mitigate) must be reasonable. The project’s “Influence area” is established by the applicant and in the TIMS ATP Tool is depicted by the “Project Area Collision Map”.

The following are some general criteria to guide applicants and evaluators in determining appropriate “influence-area” and/or overall project area for their proposed safety improvements/countermeasures (These criteria are defined in the Caltrans Highway Safety Improvement Program application Instructions). Prior to scoring the Safety Question, the evaluator should assess and try to confirm that the applicant’s “project area” (or Influence Area) shown in their maps is reasonable with respect to the following criteria:

- New Traffic Signals: crashes within 250 feet of the new signal.
- For intersection or mid-block crossing improvements, collisions that occurred within 250 feet of the intersection/mid-block crossing in all directions affected by the improvement may be used.
- Longitudinal Improvements (bike lanes, sidewalks, road diets, etc.): crashes potentially effected by and within the limits of the improvement.
- If the improvements represent a new route and there is no past crash and safety data available within the limits of the proposed improvements, the applicant should consider the potential for the project to eliminate or reduce existing conflict points on parallel routes. The crash data from parallel routes can be included where the new facility/route can be reasonably expected to reduce the likelihood of past crashes from reoccurring. The overall applicant data provided in the Narrative Questions and various attachments must support the use of parallel crash data.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

Points	Applicant’s ability to demonstrate the project location represents <u>one of the agency’s top priorities for addressing ongoing safety.</u>
5-6 Points	<p>The application <u>clearly and convincingly shows:</u></p> <ul style="list-style-type: none"> ○ <u>Collision Heat-maps</u> demonstrates that the relative collision history within the project limits is high when compared to the overall jurisdiction/community’s collision history, ○ <u>Project Area Collision Map</u> demonstrates that the past collision locations are within the “<i>Influence area</i>” of the proposed safety improvements. ○ <u>Collision Summaries and collision lists/reports</u> demonstrate the overall number of collisions is significant and that collision trends, collision types, and collision details will be positively impacted by the proposed safety improvements.
3-4 Points	<p>The application <u>somewhat shows:</u></p> <ul style="list-style-type: none"> ○ <u>Collision Heat-map</u> demonstrates that the relative collision history within the project limits is high when compared to the overall jurisdiction/community’s collision history, ○ <u>Project Area Collision Map</u> demonstrates that the past collision locations are within the “<i>Influence area</i>” of the proposed safety improvements. ○ <u>Collision Summaries and collision lists/reports</u> demonstrate the overall number of collisions is significant and that collision trends, collision types, and collision details will be positively impacted by the proposed safety improvements.
1-2 Points	<p>The application <u>minimally shows:</u></p> <ul style="list-style-type: none"> ○ <u>Collision Heat-map</u> demonstrates that the relative collision history within the project limits is high when compared to the overall jurisdiction/community’s collision history, ○ <u>Project Area Collision Map</u> demonstrates that the past collision locations are within the “<i>Influence area</i>” of the proposed safety improvements. ○ <u>Collision Summaries and collision lists/reports</u> demonstrate the overall number of collisions is significant and that collision trends, collision types, and collision details will be positively impacted by the proposed safety improvements.
0 Points	<p>Evaluators can award a score of zero if they believe the application does not provide verifiable data and does not provide data-driven documentation to demonstrate that the propose project represents one of the jurisdiction/community’s highest safety needs AND does not demonstrate that collision trends, collision types, and collision details will be positively impacted by the proposed safety improvements.</p>

4 points: Based on applicant’s ability to make a compelling case that they have analyzed their past Crash Data (or Safety Data for projects without documented crash data) and can demonstrate that the proposed safety improvements correspond to the types and locations of the past collisions.

Special Instructions & Expectations for Evaluators:

The following checks and analysis must be done by the evaluator prior to awarding points:

- Verify that the applicant demonstrated that the past crash/safety data is within the expected influence area of the proposed project.
- Verify that the applicant demonstrated that they analyzed the past crash/safety data to identify the specific crash-type trends which will likely occur in the future if no action is taken.
- Verify that the applicant demonstrated there are significant safety threats to pedestrians and/or bicycles which can be mitigated by ATP eligible improvements.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

Points	Applicant's ability to demonstrate that they have <u>analyzed their past Crash/Safety Data and the proposed safety improvements correspond to the types and locations of the past collisions.</u>
4 Points	<p>The application <u>clearly and convincingly shows:</u></p> <ul style="list-style-type: none"> • how the past crash/safety data is within the expected influence area of the proposed project, • that the past crash/safety data was analyzed by the applicant to identify the specific crash-type trends that will likely occur in the future if no action is taken, <u>AND</u> • there are significant safety threats to pedestrians and/or bicycles that can be mitigated by ATP eligible improvements.
3 Points	<p>The application <u>convincingly shows:</u></p> <ul style="list-style-type: none"> • how the past crash/safety data is within the expected influence area of the proposed project, • that the past crash/safety data was analyzed by the applicant to identify the specific crash-type trends that will likely occur in the future if no action is taken, <u>AND</u> • there are significant safety threats to pedestrians and/or bicycles that can be mitigated by ATP eligible improvements.
2 Points	<p>The application <u>somewhat shows:</u></p> <ul style="list-style-type: none"> • how the past crash/safety data is within the expected influence area of the proposed project, • that the past crash/safety data was analyzed by the applicant to identify the specific crash-type trends that will likely occur in the future if no action is taken, <u>AND</u> • there are somewhat significant safety threats to pedestrians and/or bicycles that can be mitigated by ATP eligible improvements.
1 Point	<p>The application <u>minimally shows:</u></p> <ul style="list-style-type: none"> • how the past crash/safety data is within the expected influence area of the proposed project, • that the past crash/safety data was analyzed by the applicant to identify the specific crash-type trends that will likely occur in the future if no action is taken, <u>AND</u> • there are minimal safety threats to pedestrians and/or bicycles that can be mitigated by ATP eligible improvements.
0 Points	Evaluators can award a score of zero if they believe that the application does not adequately prove the safety need of the proposed project.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

B. Safety Countermeasures (10 points max)

Describe how the project improvements will remedy (one or more) potential safety hazards that contribute to pedestrian and/or bicyclist injuries or fatalities. Referencing the information you provided in Part A, demonstrate how the proposed countermeasures directly address the underlying factors that are contributing to the occurrence of pedestrian and/or bicyclist collisions.

Breakdown of points:

- The amount of points an applicant/project receives on this sub-question is not impacted by the number of “Potential safety hazards” and “Countermeasures” documented in the application.
 - Applications only documenting one “Potential safety hazard” / “Countermeasure” has the potential of receiving full points as long as it can fully meet the scoring criteria and demonstrate that implementing only one countermeasure is appropriate to fully address the existing hazards.
 - Applications documenting numerous “Potential safety hazards” / “Countermeasures” should not automatically receive additional points. It is up to the applicant to demonstrate that each safety hazard is relevant to the non-motorized users in the project limits and that each countermeasure being funded by the project is necessary to mitigate the potential for future crashes.
 - Projects that appear to include elements/costs with little safety benefits should not receive as many points as projects with highly effective & efficient use of limited funding.

Special Instructions & Expectations for Evaluators:

The following checks and analysis must be done by the evaluator prior to awarding points:

- Evaluate the level to which the applicant demonstrated the need for the safety improvements being proposed in the project.
- Evaluate the level to which the applicant demonstrated that they analyzed the past crash/safety data trends and appropriately selected safety countermeasure(s) with proven track record(s) for addressing the past trends.
- Evaluate the level to which the applicant demonstrated that each proposed safety countermeasure(s) is appropriate to mitigate the potential for future non-motorized crashes in the area of the project.

Points	Applicant’s ability to demonstrate the project will remedy (one or more) potential safety hazards with the project limits.
9-10 Points	<p>The applicant clearly and convincingly demonstrates that:</p> <ul style="list-style-type: none"> • there is an urgent need for the countermeasure(s) proposed – based on past crash/safety data trends, • the proposed countermeasure(s) have a proven track record for addressing the past crash/safety data trends, <p style="text-align: center;"><u>AND</u></p> <ul style="list-style-type: none"> • the proposed application of the countermeasure(s) should fully mitigate the potential for future non-motorized crashes in the area of the project.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

6-8 Points	<p>The applicant convincingly demonstrates that:</p> <ul style="list-style-type: none"> • there is a significant need for the countermeasure(s) proposed – based on past crash/safety data trends, • the proposed countermeasure(s) have a proven track record for addressing the past crash/safety data trends, <p style="text-align: center;"><u>AND</u></p> <ul style="list-style-type: none"> • the proposed application of the countermeasure(s) should significantly (but not fully) mitigate the potential for future non-motorized crashes in the area of the project.
3-5 Points	<p>The applicant somewhat demonstrates that:</p> <ul style="list-style-type: none"> • there is a moderate need for the countermeasure(s) proposed – based on past crash/safety data trends, • the proposed countermeasure(s) have a track record for addressing the past crash/safety data trends, <p style="text-align: center;"><u>AND</u></p> <ul style="list-style-type: none"> • the proposed application of the countermeasure(s) should somewhat mitigate the potential for future non-motorized crashes in the area of the project.
1-2 Points	<p>The applicant minimally demonstrates that:</p> <ul style="list-style-type: none"> • there could be a need for the countermeasure(s) proposed – based on past crash/safety data trends, • the proposed countermeasure(s) have a minimal track record for addressing the past crash/safety data trends, <p style="text-align: center;"><u>AND</u></p> <ul style="list-style-type: none"> • the proposed application of the countermeasure(s) should somewhat mitigate the potential for future non-motorized crashes in the area of the project.
0 Points	Evaluators can award a score of zero if they believe that the application does not adequately prove the safety need of the proposed project.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

QUESTION #4: PUBLIC PARTICIPATION and PLANNING (0-10 POINTS)

A. Describe the community based public participation process that culminated in the project. What was the process of defining future policies, goals, investments and designs to prepare for future needs of users of this project? How did the applicant analyze the wide range of alternatives and impacts on the transportation system to influence beneficial outcomes? (3 points max)

Breakdown of points:

The level of expected planning for a project is directly connected to the magnitude and complexity of the proposed changes/designs and to the impacts to the overall transportation network.

- Projects with larger scopes and costs should demonstrate a more extensive internal planning process, including the analysis of a wide range of alternatives.

Special Instructions & Expectations for Evaluators:

The following checks and analysis must be done by the evaluator prior to awarding points:

- Consider the level to which the applicant demonstrated the agency's active transportation technical planning conducted as part of developing and refining of the project scope.
- Consider the level to which the technical planning considered both existing and future needs of the project users and transportation system.
- Consider the level to which the process was effectively integrated into the public participation process.

Points	Applicant's ability to demonstrate the public participation process will be utilized as part of the development of a plan.
3 Points	The applicant clearly and convincingly demonstrates that: The project scope was developed through a comprehensive technical planning process (appropriate for the complexity and magnitude of the project) and the planning process considered the existing and future needs of the project users and transportation system and the planning process was effectively integrated into the public participation process.
2 Points	The applicant demonstrates that: The project scope was developed through a comprehensive technical planning process (appropriate for the complexity and magnitude of the project) and the planning process considered the existing and future needs of the project users and transportation system and the planning process was effectively integrated into the public participation process.
1 Point	The applicant somewhat demonstrates that: The project scope was developed through a comprehensive technical planning process (appropriate for the complexity and magnitude of the project) and/or the planning process considered the existing and future needs of the project users and transportation system and/or the planning process was effectively integrated into the public participation process.
0 Points	Evaluators can award a score of zero if they believe that the application does not adequately prove the project scope is a result of technical planning.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

B. Who: Describe who was engaged in the identification and development of this project and how they were engaged. Describe and provide documentation of the type, extent, and duration of outreach and engagement conducted to relevant stakeholders. (3 points max)

General Guidance on stakeholders and their involvement in a project:

- Public stakeholders can include, but are not limited to, residents, targeted end users, community leaders, elected officials, advocacy organizations, local businesses, and members of vulnerable or underserved populations (i.e. elderly, youth, physically and/or mentally disabled, members from disadvantaged communities)
- Governmental stakeholders can include other departments, agencies, jurisdictions, etc. impacted by the proposed project that are NOT the applicant (these can include, but are not limited to law enforcement, transportation, local health department, schools/school districts, emergency services, metropolitan planning organization, etc.)
- Meetings and/or events and how many were held to engage stakeholders is key to Public Participation. These can include, but are not limited to:
 - The type of meetings or events: open houses, community charrettes, city council meetings, planning commission meetings, etc.
 - How the meetings or events were noticed: local newspaper, county website, on the radio, at school parents group meetings, etc.
 - How the meetings or events were documented: Meeting sign-in sheets, meeting notes, letters of support, etc.
 - Where the meetings or events took place: school, community center, city council hall, etc.
 - The accessibility of the meetings or events: accessible by public transportation, translational services provided, and time of day the meetings or events were held, etc.
 - The stakeholders' involvement in the decision-making body: technical advisory committee, citizens' advisory committee, etc.

Breakdown of points:

- Points will be awarded based on the extent that the relevant stakeholders were engaged in the development of the project and the level of community outreach and meeting/event accessibility
- The level of expected public outreach and participation for a project is directly connected to the magnitude and complexity of the proposed project and the community characteristics being served and/or impacted by the project.

Special Instructions & Expectations for Evaluators:

The following checks and analysis must be done by the evaluator prior to awarding points:

- Give consideration to any attachments the agency provided in connection with this sub-question, including but not limited to: any applicable public outreach process/proposal/plan, links to websites, meeting agenda, meeting sign-in sheet, meeting minutes, public service announcements, letters of support, etc.
- Consider the extent that the relevant stakeholders were engaged in the development of the project and the level of community outreach and meeting/event accessibility in relation to the magnitude and complexity of the proposed project and the community characteristics being served and/or impacted by the project, and how recent the latest outreach was held.
- Additional consideration can be given for documented outreach which has been ongoing for a longer duration.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

Points	Applicant's ability to demonstrate the public participation process took place in development of the proposed project, or how and who will be engaged in the development of a plan.
3 Points	The applicant clearly and convincingly demonstrates that: The project scope was developed through a comprehensive public participation process which included appropriate levels of public and governmental stakeholders, and the meetings and events were fully accessible and effectively engaged all project stakeholders.
2 Points	The applicant demonstrates that: The project scope was developed through a comprehensive public participation process which included appropriate levels of public and governmental stakeholders, and the meetings and events were accessible and effectively engaged project stakeholders.
1 Point	The applicant somewhat demonstrates that: The project scope was developed through a comprehensive public participation process which included some public and/or governmental stakeholders, and/or the meetings and events were accessible and engaged project stakeholders.
0 Points	Evaluators can award a score of zero if they believe that the application does not adequately prove the project scope was developed through an adequate public participation process.

C. What: Describe the feedback received during the stakeholder engagement process and describe how the public participation and planning process has improved the project's overall effectiveness at meeting the purpose and goals of the ATP. (2 points max)

Breakdown of points:

Points will be awarded based on:

- The extent that the public participation and planning process was utilized to identify the highest community/regional active transportation priorities and to ensure the effectiveness of the project at meeting the purpose for the ATP through the use of stakeholder feedback.
- The magnitude to which the project represents a high local-community vs. regional priority.

Special Instructions & Expectations for Evaluators:

The following checks and analysis must be done by the evaluator prior to awarding points:

- Give consideration to any attachments the agency provided in connection with this sub-question, including but not limited to: any applicable meeting minutes, letters of support, new alternatives or major revisions that were identified, etc.
- Consider the level to which the letters of support emphasize that the project represents the top or one of the top active transportation priorities for the community, targeted end users, or public stakeholders.
- Consider the extent that the public participation and planning process was utilized to:
 - improve the effectiveness of the project;
 - ensure the project is one of the highest community/regional active transportation priorities.
- Consider the magnitude of the proposed project when considering the extent to which the project represents one of the highest community/regional active transportation priorities.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

Points	Applicant's ability to demonstrate that feedback was received and how it will improve the project's overall effectiveness.
2 Points	The applicant clearly and convincingly demonstrates that: The project scope is supported by the feedback received during the public participation and planning process, and this process has improved the project's overall effectiveness, and the project is one of the highest community/regional active transportation priorities.
1 Point	The applicant somewhat demonstrates that: The project scope is supported by the feedback received during the public participation and planning process, or this process has improved the project's overall effectiveness, although the project may not be one of the highest community/regional active transportation priorities.
0 Points	Evaluators can award a score of zero if they believe that the application does not adequately prove project scope is supported by the feedback received during the public participation and planning process, or the project is not a high community/regional active transportation priority.

D. Describe how stakeholders will continue to be engaged in the implementation of the project. (1 point max)

Points	The applicant's ability to demonstrate that stakeholders will continue to be engaged in the implementation of the project/program/plan.
1 Point	The applicant demonstrates that project stakeholders will continue to be engaged in the implementation of the project/program/plan.
0 Points	Evaluators can award a score of zero if they believe that the application does not adequately demonstrates that project stakeholders will continue to be engaged in the implementation of the project/program/plan.

E. This project is specifically listed in an approved Transportation Plan. (1 point max)

Points	This project is specifically listed in an approved Transportation Plan
1 Point	This project is specifically listed in an approved Transportation Plan.
0 Points	This project is NOT specifically listed in an approved Transportation Plan.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

QUESTION #5: CONTEXT SENSITIVE BIKEWAYS / WALKWAYS AND INNOVATIVE PROJECT ELEMENTS (0-5 POINTS)

A. Context sensitive bikeways/walkways

How are the “recognized best” solutions employed in this project appropriate to maximize user comfort and for the local community context?

As you address this question consider the following:

- *The posted speed limits and actual speed,*
- *The existing and future motorized and non-motorized traffic volume,*
- *The widths for each facility,*
- *The amount of physical separation from vehicular traffic*
- *The adjacent land use, and*
- *How the project is advancing a low(er) stress environment on each facility or a low stress network*
 - *What is the current stress level? (low, medium or high)*
 - *If the stress level is medium or high, is the project going beyond minimum design standards to maximize potential users of all ages and abilities?*

B. Innovative Elements

Does this project propose any solutions that are new to their region? Were any Innovative elements considered but not selected? Explain why they were not selected.

Special Instructions & Expectations for Evaluators:

The following checks and analysis must be done by the evaluator prior to awarding points. Evaluators are to give consideration to the physical end product of context sensitive designs:

- The project satisfies the purpose and needs of a full range of stakeholders.
- The project is a safe facility for both the user and the community.
- The project is in harmony with the community, and it preserves environmental, scenic, aesthetic, historic, and natural resource values of the area.
- The project exceeds the expectations of both designers and stakeholders and achieves a level of excellence in people's minds.
- The project involves efficient and effective use of the resources (time, budget, community) of all involved parties.
- The project is designed and built with minimal disruption to the community.
- The project is seen as having added lasting value to the community.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

Points	The applicant’s ability to demonstrate that the “recognized best” solutions employed in this project are appropriate to maximize user comfort and appropriate to the local community context. Is the project proposing solutions that are new to their region?
5 Points	<p>The applicant clearly and convincingly demonstrates that:</p> <ul style="list-style-type: none"> • Recognized best solutions were employed in this project and/ or is proposing innovative solutions to best address the project’s issues/needs, OR • Recognized best solutions were employed and innovative elements were considered; and the reason for not selecting the innovative elements is very compelling.
3 Points	<p>The applicant demonstrates that:</p> <ul style="list-style-type: none"> • Recognized best solutions were employed in this project and/or • The project is proposing innovative solutions and/or • Viable innovative elements were considered and the explanation for not selecting the innovations is compelling.
1 Point	<p>The applicant somewhat demonstrates that:</p> <ul style="list-style-type: none"> • Recognized best solutions were employed and/or • The project is proposing innovative solutions and/or • Innovative elements were considered but not selected.
0 Points	Evaluators can award a zero if the solutions are not appropriate to maximize user comfort, and/or innovative solutions were not proposed, or the reason for not selecting the innovations was not compelling.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

QUESTION #6: TRANSFORMATIVE PROJECTS (0-5 POINTS)

A. Describe how your project will transform the non-motorized environment?

B. Describe how other new or proposed funded projects or policies in the vicinity of this project will attribute to the transformative nature of this project?

As you address this question consider project types (including the following):

- *Transit*
- *Land use & development*
- *Overall non-motorized network/Other active transportation projects*
- *Urban greening or public art locations*
- *Locally adopted policies*

For funded projects please attach one of the following:

- *the meeting minutes voting to fund the project, or*
- *the approved environmental document*
- *Other important documentation demonstrating the transformation*

Special Instructions & Expectations for Evaluators:

The following checks and analysis must be done by the evaluator prior to awarding points:

- What local adopted policies are in place to support the project's potential to create transformative mode-shift?
- Samples of adopted policies which impact the non-motorized environment are attached.
- Goals, objectives, and performance measures for a complete walking and/or biking network i.e. Complete Streets policy.
- Goals, objectives, and performance measures for reducing pedestrian and/or bicyclist fatalities and serious injuries.
- Land use zoning, and other development standards.
- Supportive policy tools, such as planning checklists, project development checklists, and facility design guidelines.

Points	Transforming the non-motorized environment and how other new or proposed funded projects or policies in the vicinity of this project will attribute to the transformative nature of this project
5 Points	<p>The applicant clearly and convincingly demonstrates that:</p> <ul style="list-style-type: none"> • The project is transforming the non-motorized environment and/or • This project is being combined with other projects or policy(ies) to make a transformative change
3 Points	<p>The applicant demonstrates that:</p> <ul style="list-style-type: none"> • The project is transforming the non-motorized environment and/or • This project is being combined with other projects or policy(ies) to make a transformative change
1 Points	<p>The applicant somewhat demonstrates that:</p> <ul style="list-style-type: none"> • The project is transforming the non-motorized environment and/or • This project is being combined with other projects or policy(ies) to make a transformative change
0 Points	Evaluators can award a zero if the solutions was not compelling.

2019 Active Transportation Program Large Infrastructure Scoring Rubric

QUESTION #7: COST EFFECTIVENESS (0-5 POINTS)

A project's cost effectiveness is considered to be the relative costs of the project in comparison to the project's benefits as defined by the purpose and goals of the ATP. This includes the consideration of the safety and mobility benefit in relation to both the total project cost and the funds provided.

Explain why this project is the best use of State Resources.

Special Instructions & Expectations for Evaluators:

Evaluators are to give consideration to:

- Projects that will meet the non-motorized needs for users of a wide range of ages and abilities.
- Projects that exhibit a balance between utility and aesthetics.
- The applicant has taken a systematic approach to analyzing strengths and weaknesses of various alternatives and has selected the alternative that will provide the highest benefits for the lowest cost.

Points	Cost Effectiveness – ATP benefits versus project cost
5 Points	<p>The applicant clearly and convincingly demonstrates that:</p> <ul style="list-style-type: none"> • The project's ATP benefits are maximized in relation to the project cost. • This project is the best use of the State's Resources.
3 Points	<p>The applicant demonstrates that:</p> <ul style="list-style-type: none"> • The project's ATP benefits are maximized in relation to the project cost. • This project is the best use of the State's Resources.
1 Point	<p>The applicant somewhat demonstrates that:</p> <ul style="list-style-type: none"> • The project's ATP benefits are maximized in relation to the project cost. • This project is the best use of the State's Resources.
0 Points	<p>The applicant does not demonstrate that this project is a good use of the State's Resources</p>

2019 Active Transportation Program Large Infrastructure Scoring Rubric

QUESTION #8: LEVERAGING FUNDS (0-5 POINTS)

Breakdown of points:

- Points will be awarded based on the amount of the non-ATP funding pledged to the project.

1 Point	At least 1% to 5% of total project cost
2 Points	More than 5% to less than 10% of total project cost
3 Points	At least 10% to 15% of total project cost
4 Points	More than 15% to 20% of total project cost
5 Points	More than 20% of total project cost

❖ **Points for this question will be calculated by CTC**

QUESTION #9: SCOPE AND PLAN CONSISTANCY (0-2 POINTS)

A. The application, scope and plans are consistent with one another: (2 points max.)

- *The scope and plans are consistent with one another including (2 points):*
 - Improvement location(s)*
 - Improvement element(s)*
- *Either the scope and plans are not consistent with one another including (0 points):*
 - Improvement location(s)*
 - Improvement element(s)*

Special Instructions & Expectations for Evaluators:

The following checks and analysis must be done by the evaluator prior to awarding points:

- Give consideration to all of the information contained in the application; but extra attention should be given to the written scope/project description and the plans/maps included in the application.
- Do the plans/maps show the complete project as described in the application?

2 Points	All elements are consistent
0 Points	Not all elements are consistent
