Nevada County	Road Maintenance & Rehabilitation	2018/19 Road Maintenance and Rehabilitation Program (SB 1 RMRA)	This 2018/19 road maintenance and rehabilitation plan will resurface or repave roads throughout Nevada County. Roads are selected and prioritized based on the County's Pavement Management System to ensure revenues are being used on the most high-priority and cost-effective projects that also meet the communities priorities for transportation investment. The plan includes various potential pavement preservation and replacement techniques. The 2018/19 plan is part of a comprehensive 5-year road maintenance and rehabilitation program, adopted annually by the Board of Supervisors and accounted for in the county's Capital Improvement Program (CIP).	Some or all of the following roads: E. Empire Street, Boulder Street, E. Lime Kiln Rd, Tammy Way, Alexandra Way, Alta Sierra Drive, Gary Way, Carrie Drive, Karen Drive, Brunswick Road, Duggans Road, Wet Hill Road, and Combie Road.	01/2019	06/2019	7	20	1	1
Nevada County	Road Maintenance & Rehabilitation	Rough and Ready Highway at Squirrel Creek Culvert Project (SB1 RMRA)	The project proposes to repair or replace a damaged 14-foot diameter culvert on Rough and Ready Highway at Squirrel Creek, located near the intersection of Rex Reservoir Road and just south of Rough and Ready.  The existing corrugated metal pipe culvert has been compromised in recent years, as water from Squirrel Creek has undermined soil below the large culvert. In addition, portions of the pipe's bottom has eroded away, creating additional concerns with water infiltration into the soil supporting the culvert and roadway above. As a result the culvert has begun to deform, causing portions of Rough and Ready Highway above the culvert to drop in elevation. The project will design and construct improvements at this location. Nevada County	Road Maintenance & Rehabilitation	CARRYOVER - LSR-2018-5917 SB 1 Road Maintenance and Rehabilitation Program	This 2017/18 road maintenance and rehabilitation plan will resurface or repave roads throughout Nevada County. Roads are selected and prioritized based on the County's Pavement Management System to ensure revenues are being used on the most high-priority and cost-effective projects that also meet the communities priorities for transportation investment. The plan includes various potential pavement preservation and replacement techniques. The project is a carryover from the 2017/18 fiscal year due to delays in the bidding and award process and insufficient cash flow due to sluggish SB 1 revenue reimbursements	Locations include Penn Valley Drive, Indian Springs Road, and Pleasant Valley Road	06/2018	07/2018	5	20	1	1

August 3, 2018

San Mateo County	Road Maintenance & Rehabilitation	Reconstruction of Portions of 7th Ave in the North Fair Oaks Area	A reconstruction project consists of removal of the existing road surface, reconstructing or rehabilitating the road bed, and placement of a new road surface. The road bed is the layer below the road surface. It can be reconstructed with similar material or it can be rehabilitated by pulverizing and mixing cement into the existing structural section to a depth of approximately 1 foot. Replacing or rehabilitating the road bed increases the structural capacity of the road section to a level that is required for long term performance. The new road surface is typically 2 inches of asphalt concrete or seal placed on top of the road bed.	North Fair Oaks Area of Unincorporated San Mateo County.	06/2018	09/2018	20	25	24	13
San Mateo County	Road Maintenance & Rehabilitation	Reconstruction of Streets on the West Menlo Area Priority List (Croner Avenue)	A reconstruction project consists of removal of the existing road surface, reconstructing or rehabilitating the road bed, and placement of a new road surface. The road bed is the layer below the road surface. It can be reconstructed with similar material or it can be rehabilitated by pulverizing and mixing cement into the existing structural section to a depth of approximately 1 foot. Replacing or rehabilitating the road bed increases the structural capacity of the road section to a level that is required for long term performance.
