	tional Report – Emergency G-11 Allocations (2.5f.(1))			
3 \$600,000 Los Angeles 07-LA-39 16.7/18.1	Near Azusa, within the Angeles National Forest. The Colby Fire on January 16, 2014 burned approximately 2000 acres including vegetation on the eastern slopes adjacent to the highway. Rocks and debris are falling onto the roadway from the burned out slopes. This project is to install K-rail and 5-foot chain link fence to protect the travel way from falling rock and debris.	07-4648 SHOPP/13-14 0714000175 4 4X1404 Emergency	2012-13 302-0042 SHA 20.20.201.130	\$600,000
4 \$800,000 Los Angeles 07-LA-105 16.3/17.8	Near Los Angeles, west of Route 605 at three different locations. Copper wire theft and vandalism of three pump stations rendered the pumps inoperable along this heavily traveled route. Various electrical components were damaged or destroyed during removal of the wires. Historically this highway corridor is prone to flooding during rain events and without fully operational pump stations functioning as designed, highway closure would be imminent. This project is to repair and/or replace all damaged wiring and electrical components in order to restore service. Theft deterrent features will be incorporated with the repairs.	07-4636 SHOPP/13-14 0713000334 4 4X0204 Emergency	2012-13 302-0042 SHA 20.20.201.130	\$800,000
5 \$450,000 San Bernardino 08-SBd-40 R133.0	Near Needles, at the Hacienda Wash Bridge No. 54-0871R. On December 18, 2013, routine bridge inspection uncovered severe erosion including an exposed and undermined footing at abutment 6 under highway Lane No. 1. The scouring and displacement of the rock slope protection (RSP) is estimated to have occurred during the last Monsoon season. This initial allocation is to restore upstream RSP with bigger rocks, remove displaced RSP, and restore eroded slope to original grade. The supplemental allocation is due to revising the scope of repairs to include the embedment of RSP into the channel and the use of filter fabric to prevent future failure. Initial G-11 Allocation 01/16/14: \$300,000 Supplemental G-11 Allocation 01/30/14: \$150,000 Revised Allocation: \$450,000 (Additional \$50,000 was allocated for right of way purposes).	08-0212J SHOPP/13-14 0814000121 4 1E9104 Emergency	2012-13 302-0042 SHA 20.20.201.130	\$450,000

\$48,000,000	Puente Avenue Grade Separation Project. In the city of	07-TC95	2013-14	
	Industry/unincorporated Los Angeles County at Puente	TCIF/13-14	104-6056	\$48,000,000
Alameda Corridor	Avenue. Construct a roadway underpass for Puente	CONST	TCIF	
East - Construction	Avenue; a bridge for Valley Boulevard and a double-track	\$48,000,000	20.30.210.300	
Authority	bridge for Union Pacific trains. The project includes a loop	0714000173		
<u>LACMTA</u>	connector road west of Puente Avenue and south of			
07-Los Angeles	Valley Boulevard to re-establish the connection between			
	Puente Avenue and Valley Boulevard. (TCIF Project 95.)			
	(CEQA – NOE, 03/23/2012.)			
	Outcome/Output: The project will eliminate the railroad crossing at Puente Avenue which carries 31,110 vehicles per day and where an average of 20 trains per day block traffic for 31.5 vehicle-hours of daily delay in 2010, projected to increase to 87.8 vehicle-hours of delay by 2035. Increased truck freight velocity by eliminating a bottleneck at a crossing; provides future expansion by including bridge abutment; eliminates the dangers of collisions between vehicles and trains.			
	ALLOCATION IS CONTINGENT UPON APPROVAL OF A BUDGET REVISION BY THE DEPARTMENT OF FINANCE.

	(Contributions from other sources: \$18,037,000 \$16,466,000 .)			
	Outcome/Output: Safety- public safety will improve by reducing truck trips on the regional and inter-regional highway network. Velocity- train speeds expected to increase from 20 mph to 24 mph. Throughput- LOSSAN Corridor freight train capacity will increase from four to five trains per day, equivalent to an increase of 5,627 car loads per year. Reliability- on average, fewer unanticipated train meets, track maintenance and work window conflict will reduce the travel time variability by at least 10 minutes per freight train. Congestion Reduction- The increased rail capacity will eliminate up to 9,540 truck trips annually and reduce 1,144,880 truck VMTs. Emissions Reduction- The projected reduction of 9,540 trucks by 2030 will result in the following emissions reductions: NO ₂ 200 pounds/day, PM10 260 pounds/day, and CO ₂ 500 pounds/day.			
	Amend Resolution TCIF-A-1213-08 to de-allocate \$1,319,000 in TCIF Bond Program CONST to reflect contract savings.

1 \$4,877,900 City of Los Angeles <u>LACMTA</u> 07-Los Angeles	City of Los Angeles ATCS-Wilshire East Project. Outcome/Output: The proposed ATCS is a traffic signal control system which provides fully traffic responsive adaptive signal control based on real-time traffic conditions. As traffic patterns change, ATCS has the advantage over existing systems in that traffic signal timing is automatically changed in realtime to match the current conditions. This immediately leads to improvement in the Level of Service (LOS) and reduced traffic congestion, fuel consumption, and air pollution. Results have shown that ATCS provides a minimum of 3% of added capacity as compared to the existing ATSAC System.	TLSP \$4,877,900 0714000172 4	2012-13 104-6064 TLSP	\$4,877,900
