# Homelessness in a Transportation Environment: Caltrans

John Oliva

Statewide Encampment Manager

## An Integrated Approach Prioritizing Safety & Relocation Solutions with Local Partners

- Caltrans must protect its enterprise mission to provide a safe transportation network that serves the fifth largest economy in the world.
- Caltrans has developed a preliminary risk-based system for prioritizing encampments allowing Caltrans to balance competing public health and safety demands.

## How do we protect public safety, balance mounting public concerns, while abiding by the CDC guidelines?

By refining our focus:

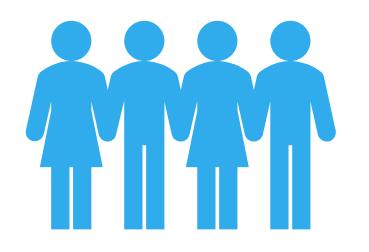

- Safety
- > Equity
- Mitigation
- Locally-driven, effective solutions that end the unsheltered status of local constituents

### Caltrans' Interim Guidance on Encampments

- Developed in response to the COVID-19 Pandemic
- Identifies and distinguishes the roles of Caltrans and partners including experts on homelessness and public safety
- Distinguishes encampments by priority (safety threat) level using an enterprise risk management methodology
- Focuses on the locally driven and supported solutions on homelessness
- Lays the foundation for Caltrans' future policies and practices in response to homelessness

## How's it going?

- Key challenges
- + hope for a different future

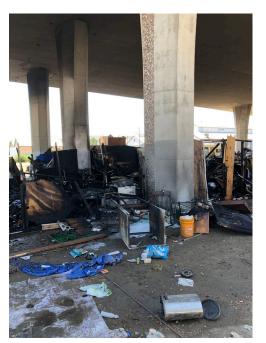

#### Ongoing + New Initiatives to Support California's Communities

## Enterprise Risk Management Methodology

	IMPACT				
SEVERITY		Safety	People	Assets	Environment
	Low (Level 4)		Attempt Mitigation and Relocation		
	Moderate (Level 3)	Incorporate Risk-Reducing Measures			
	High (Level 2)	Prioritize Relocation			
	Critical (Level 1)	Relocation Required			

#### Level 1 – Critical Emergency Priority

Must be removed immediately upon discovery.

#### Level 3 – Moderate Priority

Monitor and mitigate where possible. The focus is on relocation solutions by local governments.

#### Level 4 – Low Priority

- Not a public safety concern in comparison to level 1-3 encampments.
- Mitigation where possible.
- Focus on relocation solutions with local partners.

If what you're doing isn't working, try something different
