# Memorandum

### To: CHAIR AND COMMISSIONERS

**CTC Meeting**: May 12-13, 2021

From: MITCH WEISS, Executive Director

Reference Number: 4.24, Informational

Prepared By: Paul Golaszewski Deputy Director

Published Date: April 30, 2021

Subject: Active Transportation Program - Augmentation Proposal

#### Summary:

At the March 24-25, 2021 Commission meeting, Commissioners directed staff to submit a budget proposal to the administration for a \$2 billion one-time augmentation for the Active Transportation Program from the state's significant unanticipated General Fund surplus. The attachment includes a copy of the proposal submitted by staff.

This proposal would address the large backlog of high-quality unfunded projects for the severely oversubscribed 2021 Active Transportation Program and fund a new pilot program for bicycle highway and complete active transportation network projects. In so doing, the proposal would help to stimulate the economy and advance the state's climate and equity goals. In particular, rural and disadvantaged communities across California would benefit from having more projects funded.

Whether this proposal has been accepted by the administration will be made public when the Governor releases the May Revision Budget, which must occur by May 14, 2021. The deadline for the Legislature to pass the state budget is June 15, 2021.

#### **Background:**

The Active Transportation Program is severely oversubscribed and underfunded. For the 2021 program cycle, the Commission was only able to fund 50 projects in the Statewide and Small Urban and Rural components, or approximately 11 percent of the 454 applications. Due to the severe shortfall in funding, only 21 of the 47 counties from which the Commission received applications were represented in the adopted program for these components. Given this severe oversubscription, it is clear that additional funding is needed now to address critical safety needs, enhance connectivity, improve mobility, and make much-needed infrastructure investments, especially in underserved communities.

Attachment: Active Transportation Program Augmentation Proposal

#### California Transportation Commission Active Transportation Program Augmentation Proposal April 6, 2021

The California Transportation Commission (Commission) is requesting a one-time augmentation of \$2 billion from the General Fund for the Active Transportation Program (ATP) as it continues to explore future ongoing funding sources. The augmented funding would allow the Commission to fund the highest quality unsuccessful project applications submitted to the severely oversubscribed 2021 ATP, down to an evaluation score of 60. Applications that scored a 60 or above clearly and sufficiently demonstrated that:

- The project has the potential to increase walking and biking.
- The project will address the community's needs, specifically in the context of enhancing connectivity, mobility, and public health.
- There is a safety need for the project.
- The applicant's public engagement process was appropriate for the complexity and magnitude of the project.

A list of the 323 unsuccessful projects that scored a 60 or above is provided in Attachment A. These projects are also shown on the static map in Attachment B, and an interactive map is available online at: <u>https://maps.mapifator.com/places/W4GJNugtkwLGW9kwQozN</u>. Commission staff estimates that approximately 40 of these projects will be funded through the 2021 ATP Metropolitan Planning Organization (MPO) component, which will be adopted at the June 2021 Commission meeting. Accounting for those projects likely to be funded through the MPO component, Commission staff believes that approximately \$1.5 billion would be needed to fully fund the remainder of these projects. Commission staff would work with Caltrans and applicants to address any deliverability issues prior to programming.

The Commission was only able to fund 50 projects in the Statewide and Small Urban and Rural components of the 2021 ATP, or approximately 11 percent of the 454 applications. Unfortunately, only 21 of the 47 counties from which the Commission received applications were represented in the adopted program. The augmented program would expand the range of successful projects to 46 counties, including rural and disadvantaged communities.

The additional funding would allow the program to provide immediate benefits and investments to almost 300 more projects that benefit disadvantaged communities throughout the state. The ATP provides critical funding to address the diverse needs of disadvantaged communities throughout the state, boosting health, improving mobility, and enhancing connectivity to housing, health care facilities, grocery stores, essential community services, transit, schools, jobs, and recreation.

Along with bringing critical investments to disadvantaged communities, the augmented program would bring a broad range of other benefits to communities across the state. Out of the 323 projects on the list, 272 projects will begin preliminary engineering in state fiscal year 2021-22, immediately bolstering the economy as California recovers from the COVID-19 pandemic. The economic stimulus benefits will then continue as projects advance to construction. Under Commission guidelines, project completions are expected to occur within three years after the start of construction.

The ATP is also aligned with California's ambitious goals in addressing the climate crisis, and these projects will promote mode shift that reduces vehicle miles traveled (VMT) while also providing transit users with convenient, safe first-and-last-mile connections. In addition, walking and biking provide numerous health benefits, helping to reduce the risks of heart disease, obesity, and diabetes, and improving mental health. While more people have enjoyed the benefits of walking and biking during the COVID-19 pandemic, rates of cyclist and pedestrian fatalities have also risen sharply. These projects are necessary to address critical walking and biking safety needs in communities across the state.

After funding all projects scoring a 60 or above, the approximately \$500 million in remaining funds would be used to fund a pilot program on bicycle highways and complete active transportation networks. Although both project types are currently eligible for ATP funding, the program's limited funds and competitiveness mean that agencies are reluctant to pursue these ambitious projects. Bicycle highways provide bicycle-specific, separated alternatives to congested commuter routes. These facilities generally serve trips of five miles or more, and support higher speeds of up to 25 miles per hour. Complete active transportation networks comprehensively address communities' needs, rather than addressing problems on a spot-specific basis. These networks aim to connect key community destinations by low-stress routes that are comfortable for a range of users. The pilot program would encourage communities to pursue these projects and showcase California as a nationwide leader in transformative approaches to active transportation.

The Active Transportation Program is severely oversubscribed and underfunded. Additional funding is needed now to address critical safety needs, enhance connectivity, improve mobility, and infrastructure investments especially in underserved communities.
