Subject: California Freight Mobility Plan Update and Discussion

Summary:

Staff from the California Department of Transportation (Caltrans) Division of Transportation Planning will provide an overview of the Draft 2027 California Freight Mobility Plan (CFMP). The presentation will be provided by Strategic Freight Planning Office Chief Kalin Pacheco and Acting California Freight Mobility Plan Program Manager Kiran Parmar. The presentation will cover advisory opportunities for the Interagency Equity Advisory Committee (Committee) to identify common freight-related themes and focus areas that currently impact their communities. Members will also have the opportunity to share feedback through the 2027 CFMP Community Survey. Input will inform future strategies and actions in the plan and ultimately be utilized in policy-making decisions to address future outcomes surrounding freight activities. The Draft 2027 CFMP is anticipated to be completed by December 2026 and made available for public review through June 2027.

Background:

The CFMP is California's long-range statewide plan that governs immediate and long-range freight planning activities and capital investments. The CFMP aims to address significant freight system trends, issues, and opportunities to increase economic competitiveness, while evaluating and prioritizing social and environmental needs. The 2027 CFMP will provide an update to the previous iteration published in 2023 and will include a revised CFMP vision statement and refined goals, objectives, and strategies to better inform goods movement activity in California and to help monitor and track implementation efforts in the future.
