Interagency Equity Advisory Committee: Vision, Mission, and Foundational Principles for Transportation Equity

October 2025

●●●●●

Vision Statement

Our vision is a California where transportation systems serve all people equitably, reflect the rich diversity of our communities, empower economic opportunity, and foster safety, mobility justice, disability access, and sustainability for generations to come.

We envision an affordable, reliable, connected, efficient, accessible, innovative network that prioritizes and responds to the rapidly changing needs of underserved populations, including our seniors, people with disabilities, and communities historically harmed by systemic inequities.

Rooted in the understanding of our interconnected relationship with the land, we are committed to supporting the reduction of environmental harm, the integration of renewable energy, and the advancement of ecological and environmental justice throughout our transportation system — including the protection of wildlife corridors and natural resources.

Guided by community partnerships, disability justice principles, cultural responsiveness, and climate resilience, we strive to transform our transportation infrastructure into a just, inclusive, and forward-thinking system that enhances quality of life and nurtures the well-being of all Californians.
