Directors Signature Request

SB-1 Project Baseline Agreement:

The Commission adopted the original SB-1 Accountability and Transparency Guidelines on March 21, 2018, and a revised version on May 16, 2018. The Guidelines require the development of project baseline agreements for Commission adopted SB-1 programs, subject to certain cost thresholds and conditions. The baseline agreement is to be signed by the Project Applicant, Implementing Agency, Caltrans District Director, Caltrans Director of Transportation, and the Executive Director of the California Transportation Commission. It is anticipated that the Commission will approve the baseline agreement at their meeting scheduled for: October 9, 2019

| 1. | FUNDING PROGRAM |
| | Active Transportation Program |
| | Local Partnership Program (Competitive) |
| | Solutions for Congested Corridors Program |
| | State Highway Operation and Protection Program |
| | Trade Corridor Enhancement Program |
| 2. | PARTIES AND DATE |
| 2.1 | This Project Baseline Agreement (Agreement) for the Doran Street Grade Separation Active Transportation Project, effective on, October 9, 2019 (will be completed by CTC), is made by and between the California Transportation Commission (Commission), the California Department of Transportation (Caltrans), the Project Applicant, the Los Angeles Co. Metropolitan Transportation Authority, and the Implementing Agency, the Los Angeles Co. Metropolitan Transportation Authority, sometimes collectively referred to as the "Parties". |
| 3. | RECITAL |
| 3.2 | Whereas at its January 30, 2019 meeting the Commission approved the Active Transportation Program, and included in this program of projects the Doran Street Grade Separation Active Transportation Project, the parties are entering into this Project Baseline Agreement to document the project cost, schedule, scope and benefits, as detailed on the Project Programming Request Form attached hereto as Exhibit A and the Project Report attached hereto as Exhibit B, as the baseline for project monitoring by the Commission. |
| 3.3 | The undersigned Project Applicant certifies that the funding sources cited are committed and expected to be available; the estimated costs represent full project funding; and the scope and description of benefits is the best estimate possible. |
| 4. | GENERAL PROVISIONS |
| | The Project Applicant, Implementing Agency, and Caltrans agree to abide by the following provisions: |
| 4.1 | To meet the requirements of the Road Repair and Accountability Act of 2017 (Senate Bill [SB] 1, Chapter 5, Statutes of 2017) which provides the first significant, stable, and on-going increase in state transportation funding in more than two decades. |
| 4.2 | To adhere, as applicable, to the provisions of the Commission: |
| | Resolution G-19-31, "Adoption of Program of Projects for the Active Transportation Program", dated January 30, 2019 |
| | Resolution Insert Number, "Adoption of Program of Projects for the Local Partnership Program", dated |
| | Resolution Insert Number, "Adoption of Program of Projects for the Solutions for Congested Corridors Program", dated |
| | Resolution Insert Number, "Adoption of Program of Projects for the State Highway Operation and Protection Program", dated |
| | Resolution Insert Number, "Adoption of Program of Projects for the Trade Corridor Enhancement Program", dated |

- 4.3 All signatories agree to adhere to the Commission's Active Transportation Program, Guidelines. Any conflict between the programs will be resolved at the discretion of the Commission.
- 4.4 All signatories agree to adhere to the Commission's SB 1 Accountability and Transparency Guidelines and policies, and program and project amendment processes.
- 4.5 The Los Angeles Co. Metropolitan Transportation Authority agrees to secure funds for any additional costs of the project.
- 4.6 The Los Angeles Co. Metropolitan Transportation Authority agrees to report to Caltrans on a quarterly basis; after July 2019, reports will be on a semi-annual basis on the progress made toward the implementation of the project, including scope, cost, schedule, outcomes, and anticipated benefits.
- 4.7 Caltrans agrees to prepare program progress reports on a quarterly basis; after July 2019, reports will be on a semi-annual basis and include information appropriate to assess the current state of the overall program and the current status of each project identified in the program report.
- 4.8 The Los Angeles Co. Metropolitan Transportation Authority agrees to submit a timely Completion Report and Final Delivery Report as specified in the Commission's SB I Accountability and Transparency Guidelines.
- 4.9 All signatories agree to maintain and make available to the Commission and/or its designated representative, all work related documents, including without limitation engineering, financial and other data, and methodologies and assumptions used in the determination of project benefits during the course of the project, and retain those records for four years from the date of the final closeout of the project. Financial records will be maintained in accordance with Generally Accepted Accounting Principles.
- 4.10 The Transportation Inspector General of the Independent Office of Audits and Investigations has the right to audit the project records, including technical and financial data, of the Department of Transportation, the Project Applicant, the Implementing Agency, and any consultant or sub-consultants at any time during the course of the project and for four years from the date of the final closeout of the project, therefore all project records shall be maintained and made available at the time of request. Audits will be conducted in accordance with Generally Accepted Government Auditing Standards.

5. SPECIFIC PROVISIONS AND CONDITIONS

5.1 Project Schedule and Cost
See Project Programming Request Form, attached as Exhibit A.

5.2 Project Scope

See Project Report or equivalent, attached as <u>Exhibit B</u>. At a minimum, the attachment shall include the cover page, evidence of approval, executive summary, and a link to or electronic copy of the full document.

5.3 Other Project Specific Provisions and Conditions

July 24, 2018

Ms. Laurie Berman
Director, California Department of Transportation
1120 N Street, MS-49
Sacramento, CA 95814

Subject: Letter of Intent for future maintenance of the Doran Street and Broadway/Brazil Grade Separation Project – Active Transportation Bridges in ATP Cycle 4 application

Dear Ms. Berman:

I am pleased to submit this letter of intent indicating the City of Glendale's readiness to assume responsibility along with the City of Los Angeles for future joint maintenance and operations of the River Walk and River Access Active Transportation Bridges upon completion of construction by LA Metro. These active transportation bridges are included in the Active Transportation Program (ATP) Cycle 4 grant application submitted by LA Metro. The proposed project will improve safety at one of the most dangerous at-grade rail crossings in California while connecting the City of Glendale and Los Angeles residents to the LA River to enjoy the natural environment.

Metro's effort to construct the River Access and River Walk active transportation bridges in a local disadvantaged community is necessitated by the planned closing of Doran Street at-grade crossing which will also cut off the Glendale community from the North Atwater Village area. The River Access Bridge will replace the east/west active transportation connection lost by the at-grade crossing closing and provide a necessary connection to the natural amenities along the Los Angeles River, and the River Walk Bridge will cover the north/south link to North Atwater via the new bicycle and pedestrian facilitates being constructed to the north of Verdugo Wash and planned to the south of the project limits.

This project will allow Metro and the City of Glendale work towards the goals of safe and sustainable active transportation throughout the region. If you have any questions, please do not hesitate to contact

Roubik Golanian, P.E. Assistant City Manager Public Works Director

Note: When quantifying the amount of Active Transportation improvements proposed by the project, do not double-count the improvements that benefit both Bicyclists and Pedestrians (i.e. new RRFB/Signal should only show as a Pedestrian or Bicycle Improvement). ⊠ Bicycle Improvements What % of the BICYCLE related project cost are going towards closing a "Gap" in infrastructure? 100 % (As opposed to cost going towards "improving" existing bicycle infrastructure: i.e. Class 2 to Class 4) 1,000 New Bike Lanes/Routes: Class 1: Linear Feet Linear Feet Class 4: Linear Feet Class 3: Linear Feet 0 Signalized Intersections: New Bike Boxes: Timing Improvements: Number-Number 0 Un-Signalized Intersections: New RRFB/Signal: Crossing-Surface Improvements: Number 0 Mid-Block Crossing: New RRFB/Signal: Crossing-Surface Improvements: Number Number Lighting: Roadway Segments: Linear Feet Intersection: Number Bike Share Program: New Station: Number New Bikes: Q Number New Secured Lockers: 0 Number Bike Racks/Lockers: New Racks: Number Other Bicycle Improvements: #1: River Walk Bridge #2: River Access Bridge **Pedestrian Improvements** Multi-use Trail Improvements Vehicular-Roadway Traffic-Calming Improvements

ATP - Caltrans R/W Impact Checklist Required for Infrastructure Projects with Impacts to Caltrans R/W

City of Glendale: Doran/Broadway Grade Separation

This form is a required part of the ATP project application for all candidate projects located on the Caltrans R/W, adjacent to the Caltrans R/W, or have any potential impacts to the Caltrans R/W. This includes, but is not limited to, impacts from Caltrans required easements, Caltrans required encroachment permits, RW acquisition or utility relocations. This form is intended to help the Implementing Agency consider these risks during the initial application process, and properly assess the needed time and cost to accomplish the task(s).

To complete the form, the Implementing Agency is required to answer all questions in Part A, below. Part B, of this form is to be completed by the Caltrans District Local Assistance Engineer (DLAE), or their delegated staff person. Once completed, the DLAE returns this form to the Implementing Agency, so they may attach the form to their ATP project application. A minimum of 2-weeks is required for Caltrans review. (NOTE: If the agency submits an incomplete checklist and/or attachments, Caltrans will be required to return the package for correction and re-submittal. The 2-week process will restart once the ogency makes the carrections and resubmits.)

Ms. Laurie Berman Director, California Department of Transportation 1120 N Street, MS-49 Sacramento, CA 95814

Subject:

Letter of Support for Doran Street and Broadway/Brazil Grade Separation Project – Application for Active Transportation Program (ATP) Cycle 4

Dear Ms. Berman:

Glendale Water and Power is pleased to submit this letter of support for the **Doran Street and Broadway/Brazil Grade Separation Project (Active Transportation Access)** application under the Active Transportation Program (ATP) Cycle 4. The proposed project will improve safety at one of the most dangerous at-grade rail crossings in California while connecting the City of Glendale and Los Angeles residents to the LA River to enjoy the natural environment.

Metro's effort to construct the River Access and River Walk active transportation bridges in a local disadvantaged community is necessitated by the planned closing of Doran Street at-grade crossing which will also cut off the Glendale community from the North Atwater Village area. The River Access Bridge will replace the east/west active transportation connection lost by the at-grade crossing closing and provide a necessary connection to the natural amenities along the Los Angeles River, and the River Walk Bridge will cover the north/south link to North Atwater via the new bicycle and pedestrian facilitates being constructed to the north of Verdugo Wash and planned to the south of the project limits.

I respectfully request that you give favorable consideration to this funding application, which will allow Metro and partners to work towards the goals of safe and sustainable active transportation throughout the region. If you have any questions, please do not hesitate to contact Michael De Ghetto at (818) 551-3023.

Sincerely,

Michael E. De Ghetto, P.E.

Chief Assistant General Manager - Water

7-Los Angeles County Metropolitan Transportation Authority-1 Doran Street Grade Separation Active Transportation Access Project

Part A5: Project Schedule

NOTES: 1) Per CTC Guidelines, all project applications must be submitted with the expectation of receiving federal funding and therefore the schedule below must account for the extra time needed for federal project delivery requirements and approvals, including a NEPA environmental clearance and for each CTC allocation there must also be a Notice to Proceed with Federally Reimbursable work. 2) Prior to estimating the durations of the project delivery tasks (below), applicants are highly encouraged to review the appropriate

| chapters of the Local Assistance Procedures Manual and work closely with District Local Assistance Staff. 3) The proposed CTC Allocation dates must be between July 1, 2019 and June 30, 2023 to be consistent with the available ATP fur for Cycle 4. | ds |

| NI-CON/ PLAN | 100 100 100 100 100 100 100 100 100 100 | | | | | _ | - | -, -, |
| TOTAL | 22,219 | 16,319 | | 5,900 | | - | 5,900 | |

The CTC Allocation-Year is calculated based on the information entered into the "Project Schedule" section.

TP FUNDING TYPE REQUESTED:

er the CTC Guidelines, all ATP projects must be eligible to receive federal funding. Most ATP projects will receive federal funding; however, it is the intent of the Commission to consolidate the allocation of federal funds to as few projects as practicable. Therefore, the smallest projects may be granted State Funding from the State Highway Account (SHA) for all or part of the project. Agencies with projects under \$1M. especially ones being implemented by agencies who are not familiar with the federal funding process, are encouraged to request State funding.

7-Los Angeles County Metropolitan Transportation Authority-1
Doran Street Grade Separation Active Transportation Access Project

Part A7: Screening Criteria

The following Screening Criteria are requirements for applications to be considered for ATP funding. Failure to demonstrate a project meets these criteria will result is the disqualification of the application.

| 1. | D | emonstrated fiscal needs of the applicant: | | | | | | | | | |
|----|----|---|--|--|--|--|--|--|--|--|--|
| | - | Is all or part of the project currently (or has it ever been) formally programmed in an RTPA, MPO and/or Caltrans funding program? Yes No | | | | | | | | | |
| | | Are any elements of the proposed project <u>directly or indirectly</u> related to the intended improvements of a | | | | | | | | | |
| | | If "Yes", explain why the other project cannot fund the proposed project. (Max of 200 Words) Words Remaining: 5 | | | | | | | | | |
| | | This project is directly related to several larger capital improvement projects. It is a component of the Doran Street and Broadway/Brazil Grade Separation Project, which has the overall purpose of closing two existing at-grade railroad crossings and consists primarily of new infrastructure supporting motorized vehicle access into and out of North Atwater Village. The project is also closely tied to the Glendale Narrows Riverwalk Project, which is creating recreational attractions along and across the Los Angeles River to which the new active transportation bridges will connect. Lastly, it is tied to the LA River Revitalization Project, which aims to restore the Los Angeles River and create recreational resources along its banks for 11 miles from Burbank to downtown Los Angeles. | | | | | | | | | |
| | ٠. | Funding is needed for the active transportation access project. There are currently too few funding sources available for the grade separation project, and those that are available are already programmed for those elements directly linked to separation of motorized vehicles and trains, such as Measure R 3%. These active transportation elements were developed fairly recently, during the environmental review phase of the grade separation project, in which the local jurisdictions expressed a need for them. | | | | | | | | | |
| | - | Are adjacent properties undeveloped or under-developed where standard "conditions of development" Yes No could be placed on future adjacent redevelopment to construct the proposed project improvements? | | | | | | | | | |
| 2. | Co | onsistency with an adopted regional transportation plan: | | | | | | | | | |
| | | ls the project consistent with the relevant adopted regional transportation plan that has been developed and ⊠ Yes □ No updated pursuant to Government Code Section 65080? | | | | | | | | | |
| | | If "Yes", the applicant must provide that portion of Regional Transportation Plan showing that the proposed project is consistent. Attach a copy of ONLY the following elements of the plan: cover page and pages linking the proposed project to the plan. Highlighted and/or mark the attachment to clearly identify the connection. | | | | | | | | | |
| | | Part A7.2 Plan Consistency.pdf | | | | | | | | | |
| | | Note: Projects not providing proof will be disqualified and not be evaluated. | | | | | | | | | |
| 3. | ls | the Implementing Agency Caltrans? | | | | | | | | | |

Part B: Narrative Questions

Question #1

| QUESTION #1 | | | |
|----------------------|-------------|--------|---------------|
| DISADVANTAGED | COMMUNITIES | (0-10) | POINTS |

This project does not qualify as a Disadvantaged Community.

Map of Project Boundaries, Access and Destination (0 points): Required

Provide a scaled map showing the boundaries of the proposed project/program/plan, the geographic boundaries of the disadvantaged community, and disadvantaged community access point(s) and destinations that the project/program/plan is benefiting.

Part B Question 1.A Project Boundaries, Access and Destination pdf

B. Identification of Disadvantaged Community: (0 points)

Select one of the following 4 options. Must provide information for all Census Tract/Block Group/Place # that the project affects.

- Median Household Income
- CalEnviroScreen
- Free or Reduced Priced School Meals Applications using this measure must demonstrate how the project benefits the school students in the project area.
- Other

Select Option: CalEnviroScreen

An area identified as among the most disadvantaged 25% in the state according to the CalEPA and based on the California Communities Environmental Health Screening Tool 3.0 (CalEnviroScreen 3.0) scores (score must be greater than or equal to 39.34). This list can be found at the following link under SB 535 List of Disadvantaged Communities:

https://oehha.ca.gov/calenviroscreen/report/calenviroscreen-30

| Census Tract/Block Group/Place # | Population | CalEnviroScreen Score |
|----------------------------------|------------|-----------------------|
| 1881.00 | 4,076 | 63.51 |
| 3016.01 | 6,198 | 70.91 |
| 3017.01 | 2,849 | 52.67 |
| 3017.02 | 5,556 | 51.93 |
| 3023.01 | 3,790 | 54.62 |

Highest California Communities Environmental Health Screening Tool (CalEnviroScreen) score from above (autofill):

70.91 (to be used for qualifying as benefiting a DAC only)

California Communities Environmental Health Screening Tool (CalEnviroScreen) score for the community benefited by the project;

(to be used for severity calculation only)

Must attach a copy of CalEnviroScreen page for each census tract listed above. Attach all pages as one pdf.

Part B Question 1.B Disadvantaged Communities.pdf

C. Direct Benefit: (0 - 4 points)

1. Explain how the project closes a gap, provides connections to, or addresses a deficiency in an active transportation network or meets an important community need. (Max of 150 Words) Words Remaining:

The community needs these bridges as a result of two projects that have been in development for many years. The first is the closing of the Doran Street at-grade crossing, which will remove one of the most dangerous at-grade rail crossings in California, but will also cut off the rest of the community from North Atwater Village. The second project is the LA River Revitalization Project, which will make the Los Angeles River a place people can go to enjoy the natural environment. The River Access Bridge will replace the active transportation connection lost by the at-grade crossing's closing and provide a necessary connection to the natural amenities along the Los Angeles River, and the River Walk Bridge will link North Atwater Village to new bicycle and pedestrian facilities being constructed to the north of Verdugo Wash and planned to the south.

2. Explain how the disadvantaged community residents will have physical access to the project. (Max of 150 Words)

Words Remaining:

The disadvantaged communities will have access to the project from the Glendale Narrows Riverwalk development located north of the project. which is a collection of existing and planned recreational facilities in the City of Glendale along and over the Los Angeles River, Residents from th

Doran Street Grade Separation Active Transportation Access Project

Riverside Rancho, Central Estates, and Pelanconi neighborhoods of Glendale will access the Glendale Narrows Riverwalk Project through the regular street network. Residents in the Atwater Village community will access the project through the regular roadway network. Residents from the Vineyard and Moorpark neighborhoods east of the railroad tracks will access the project from the Doran Street and San Fernando Road intersection, which they can access through the City of Glendale bike and pedestrian network.

Illustrate and provide documentation for how the project was requested or supported by the disadvantaged community residents. (Max of 150 Words) Words Remaining:

Page 19 of 36

Since 2014, there have been five rounds of public meetings conducted for the Doran Street and Broadway/Brazil Grade Separation Project held in the community. These include four rounds of general project update community meetings and one round of meetings focused on the interim conditions aimed at making the at-grade crossings safer in advance of a full closure. The two earlier rounds of public meetings in 2014 resulted in refinements to the alternatives being considered for the closures of the Doran Street and Broadway/Brazil intersections. The later two rounds of public meetings in 2016 and 2017 developed the concepts for active transportation, focusing on pedestrian access points to replace those lost with the closures of the Doran Street and Broadway/Brazil at-grade crossings. Public comments from the earlier rounds of community meetings pointed

7-Los Angeles County Metropolitan Transportation Authority-1
Doran Street Grade Separation Active Transportation Access Project

Part B: Narrative Questions

Question #2

QUESTION #2

POTENTIAL FOR INCREASED WALKING AND BICYCLING, ESPECIALLY AMONG STUDENTS, INCLUDING THE IDENTIFICATION OF WALKING AND BICYCLING ROUTES TO AND FROM SCHOOLS, TRANSIT FACILITIES, COMMUNITY CENTERS, EMPLOYMENT CENTERS, AND OTHER DESTINATIONS; AND INCLUDING INCREASING AND IMPROVING CONNECTIVITY AND MOBILITY OF NON-MOTORIZED USERS. (0-38 POINTS)

Please provide the following information: (This must be completed to be considered for funding.)

| # of Users | Pedestrian | Bicycle | Date of Counts | Mark here if N/A to project |
|------------|------------|---------|----------------|-----------------------------|
| Current | 132 | 120 | 5/26/2016 | |

<u>Safe Routes to School projects:</u> The following information related to the Safe Routes to School Projects data was already entered in part 3 of the application.

| School | Total Student Enrollment | Approx. # of Students Living Along School Route Proposed | # of Students Currently Walking/Biking to School |
|--------|-----------------------------|--|--|
| | | , | |
| Total | Ö | 0 | 0 |

Document the methodologies used to establish the current count data. (Max of 250 Words)

Words Remaining:

64

Manual counts of pedestrians and cyclists were taken at the Doran Street & San Fernando Road intersection and the Doran Street & West San Fernando Road intersection on Thursday, May 26, 2016. Counts were made over a 2-hour period in the morning peak (7am to 9am) and 2-hour period during the afternoon peak (4pm to 6pm). The total counts were multiplied by three to estimate daily counts.

It should be noted that these numbers only reflect local travel, as there are currently no regional facilities along the Los Angeles River that can be accessed from the northern part of Atwater Village. Because these trips are assumed to be local in nature, it is assumed that omitting weekend counts is acceptable, as there would be few trips that are regional and/or recreational in nature. The construction of the River Walk Bridge will open up the area for regional and recreational travel, so future counts will include more types of trips and will need to be made along the River Walk Bridge, as well as on the River Access Bridge, to fully account for the public's usage of the new facilities.

A. Statement of project need. Describe the issue(s) that this project will address. How will the proposed project benefit the non-motorized users? What is the project's desired outcome and how will the project best deliver that outcome? (0-19 points)

Discuss:

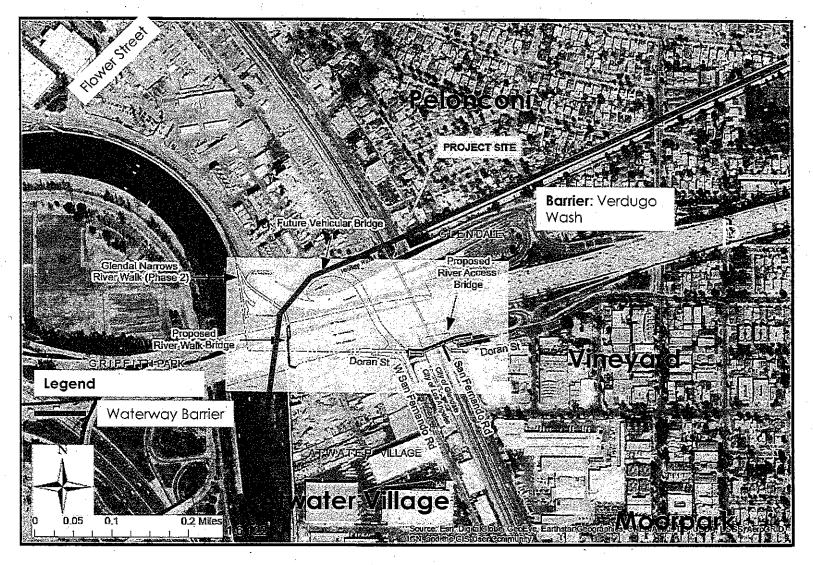

- · Lack of connectivity
- The lack of mobility if applicable Does the population have limited access to cars, bikes, and transit?
 - o Does the project have an unserved or underserved demand?
- The local health concerns responses should focus on:
 - Specific local public health concerns, health disparity, and/or conditions in the built and social environment that affect the
 project community and can be addressed through the proposed project. Please provide detailed relevant answers instead of
 general descriptions of the health benefits of walking and biking (i.e. "walking and biking increase physical activity").
 - o Local public health data demonstrating the above public health concern or health disparity. Data should be at the smallest geography available (state or national data is not sufficient). One potential source is the Healthy Places Index (HPI) (http://healthyplacesindex.org)
- For combined I/NI projects: Discuss need for an encouragement, education, and/or enforcement program.

(Max of 1000 Words)

Words Remaining:

218

Restoring and enhancing bicycle and pedestrian connectivity and improving safety are the primary goals of the Doran Street Grade Separation Active Transportation Access Project. This project will be carried out under the umbrella of the Doran Street and Broadway-Brazil Grade Separation Project, which will close two at-grade crossings with histories of pedestrian fatalities. Based on collision data, the Doran Street at-grade crossing is considered 12.5 times as dangerous as the average at-grade crossing in California according to the state agency responsible for its regulation, the California Public Utilities Commission (CPUC). This grade separation project is particularly important today because train frequencies are expected to increase by 50% in the next decade with planned commuter rail service expansions and the initiation of high-speed rail service, as well as continued freight train use. The Doran Street Grade Separation Active Transportation Access Project is required to restore the access that will be lost with the closing of the Doran

| | With the construction of the River Access Bridge, connectivity between North Atwater Village and its neighboring communities to the east in | | | | | | |

With the construction of the River Access Bridge, connectivity between North Atwater Village and its neighboring communities to the east in Glendale, including Moorpark and Vineyard, will be maintained and enhanced for active transportation users. Residents from these communities will be able to access the existing and planned amenities along the Los Angeles River, including North Atwater Park to the south and the amenities associated with Glendale Narrows Riverwalk Project to the north (with the construction of the River Walk Bridge). When the Glendale Narrows Riverwalk Project is complete, North Atwater Village will connect to new parks, trails, the Los Angeles Zoo, and museums. With the River Access Bridge, residents and employees from the North Atwater Village community will also be able to more safely access bus stops along Doran Street and San Fernando Road and other transit services safely and directly.

7-Los Angeles County Metropolitan Transportation Authority-1 Doran Street Grade Separation Active Transportation Access Project

Part B: Narrative Questions

Question #3

QUESTION #3

POTENTIAL FOR REDUCING THE NUMBER AND/OR RATE OF PEDESTRIAN AND BICYCLIST FATALITIES AND INJURIES, INCLUDING THE IDENTIFICATION OF SAFETY HAZARDS FOR PEDESTRIANS AND BICYCLISTS. (0-20 POINTS)

Describe the project location's history of pedestrian and bicycle collisions resulting in fatalities and injuries to non-motorized users, which this project will mitigate. (10 points max)

Applicants are encouraged to use the new UC Berkeley SafeTREC TIMS tool which was specifically designed for the ATP to produce these documents in an efficient manner. Applicants with access to alternative collision data tools and training can utilize their choice of methods/tools. Applicants must respond to question 1 or 2, and have the option to respond to both.

- For applications using the TIMS ATP tool, attach the following:
 - a. Collision Heat-map of the area surrounding the project limits demonstrating the relative collision history of the project limits in relation to the overall jurisdiction/community's collision history
 - b. Project Area Collision Map identifying the past crash locations within the project limits
 - Collision Summaries and collision lists/reports demonstrating collision trends, collision types, and collision details
 - For a Combined INI project If the NI project area is different than the infrastructure portion, the applicant may attach NI related heat-maps, etc in Attachment J

Combine the various maps/summaries into one PDF file and attach it in the field below.

| Dort D. Overtion 2. A.1. Collision Symmetry pdf | | |

| Part B Question 3.A1 Collision Summary.pdf | , | |
| | | |

Applications that do not have the collision data above OR that prefer to provide additional collision data and/or safety in a different format can provide this data below. (Examples include: Collision Rates, Community Observations, surveys, etc.)

The data and corresponding methodologies can be included in written/text form and/or via a separate attachment in the field below.

(Max of 200 Words) (optional)

Words Remaining: 40

Without the River Access Bridge, pedestrians and cyclists wishing to get to and from the northern section of Atwater Village would have to travel north or south along San Fernando Road to alternative access points, and that is why a 1-mile stretch of San Fernando Road was selected for a collision analysis. The years 2009 to 2014 were selected to provide data from years that corresponded to years for which train collision data was available (described below).

In addition to the traffic collision data, the Southern California Railroad Authority (SCRRA), or Metrolink, maintains records of train collisions. At the Doran Street at-grade crossing, there have been two recorded collisions since between 2009 and 2014. The most recent recorded collision was on March 24, 2014, but this did not include a pedestrian or cyclists. The other collision resulted in a pedestrian facility in 2009, and this is included in the table below. The list of collisions from 1990 is attached below.

Data and methodologies Attachment (optional)

Part B Ouestion 3.A2 Train Collision Data.pdf

From the project-area collision summaries/data provided in questions 1 and/or 2, enter the total reported pedestrian and/or bicycle collisions using the most recent 5 to 11 years of available data:

How many years of collision data were used in the Heat Maps and collision summaries:

| # of Crashes | Pedestrian | Bicycle | Total | Average Per Year |
|--------------|------------|---------|-------------|------------------|
| Fatalities | 1 | 0 | 1 | 0.17 |
| Injuries | 2 | , 8 | 10 7 (-10) | 1.67 |
| Total | 3 - | 8 2 | 11 | 183 |

ATP Maps & Summary Data

The tool is designed to support the California Active Transportation Program (ATP), as well as active transportation users and practitioners throughout California. The tool utilizes interactive collision maps to allow users to track and document pedestrian and bicycle collisions and generate data summaries within specified project and/or community limits.

Step 1: Select a County/City, Bike/Ped, Severity, and Years

County: Los Angeles

City: Glendale

Include State Highway Related Collisions: No

Involved With: Pedestrian and Bicycle

Collision Severity: Fatal, Severe Injury, Other Visible Injury, and Complaint of Pain

Year: 2009 - 2014

Collision Summary for initial parameters defined above:

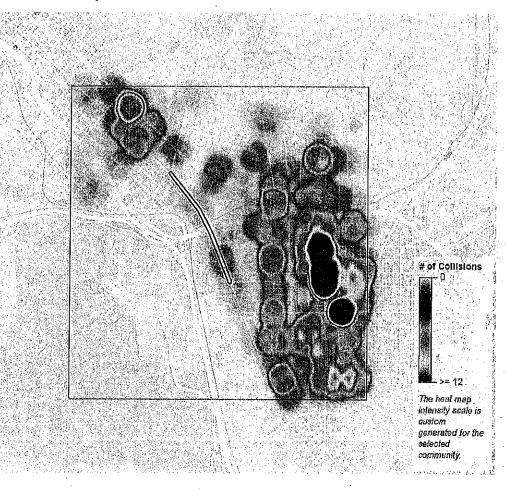

Number of Collisions by Collision Severity

| Involved With | Fatal | Severe Injury | Visible Injury | Cor | nplaint of Pain | Total |
|---------------|-------|---------------|----------------|-----|-----------------|-------|
| Bicycle | 2 | 18 | 196 | Ė | 113 | 329 |
| Pedestrian | 14 | 47 | 247 | | 263 | 571 |

Community Heat Map:

Step 3: Draw the project boundaries to get detailed collision data summaries and map

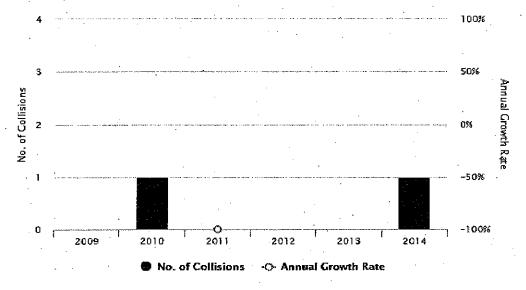

Step 5: Review the collision summary data, graphs and tables provided.

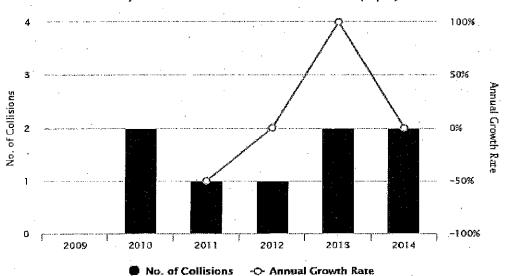

Summary Results

| Involved With | Fatal | Severe injur | y | Visible Injury | Compl | aint of F | ain. | Total |
|---------------|-------|--------------|---|----------------|-------|-----------|------|-------|
| Bicycle | 0 | | 1 | 6 | | | 1 | 8 |
| Pedestrian | 0 | | 1 | , 0 | | | 1 | 2 |

Pedestrian Collisions Annual Growth (N/A)

Bicycle Collisions Annual Growth (N/A)

From 1990 to 2014, there have been seven accidents, resulting in two fatalities at the Doran Street highway-rail crossing. The accident to crossing ratio for Doran Street is approximately 12.5 times greater than the average for all at-grade crossings. Table 3 contains a list and brief description of the seven accidents that occurred at the Doran Street grade crossing.

| Date | Time | Description |
|------------|----------|--|
| 04/24/1995 | 9:55 AM | An Amtrak train hit a truck and trailer. There were no fatalities or injuries reported. |
| 09/12/1995 | 7:48 AM | A Metrolink train hit a truck and trailer. There were no fatalities or injuries reported. |
| 10/02/1998 | 10:00 AM | An Amtrak train hit a vehicle. There were no fatalities or injuries reported. |
| 01/23/2003 | 3:10 PM | An Amtrak train hit a vehicle. There were no fatalities or injuries reported. |
| 07/27/2004 | 9;38 PM | A UPRR freight train hit a pedestrian resulting in one fatality. |
| 11/23/2009 | 11:34 AM | An Amtrak train hit a pedestrian resulting in one fatality. |
| 24/03/2014 | 6:05 PM | A vehicle was blocked by traffic while attempting to cross Doran Street and was hit by a Metrolink train. There were no fatalities or injuries reported. |

Table 3

The CPUC does not have a record when the Doran Street crossing was established. However, RCEB was able to determine that from February 1927 to the present there have been a total of 44 accidents at the crossing involving seven fatalities and 32 injuries.

SB 348 (Galgiani)

SB 348 would extend the repeal date for PRC Section 21080.14 until January 1, 2019. Until then, the limited term CEQA exemption would continue to be available for closure of unsafe at-grade crossing by order of the CPUC to protect public safety in a safer, more efficient, and cost-effective manner.

DIVISION ANALYSIS (Safety and Enforcement Division)

- The CPUC's Safety and Enforcement Division (SED) has analyzed the proposed Senate Bill (SB) 348 for any potential effects on its functions as a CEQA responsible agency and its jurisdiction over rail and transit facilities and crossings.
- While the CPUC rarely exercises authority to close crossings over the objection of local authorities, as in the case of the Doran Street crossing, it is important for the CPUC to have this authority. The proceedings discussed above were the only two cases where the CPUC staff sought to have the CPUC order a crossing closed in the past 10 years period prior to the passage of AB 1665 of 2012.

149974301

ATP CYCLE 4 APPLICATION FORM LAPG 22-U (NEW 05/2018)

7-Los Angeles County Metropolitan Transportation Authority-1 Doran Street Grade Separation Active Transportation Access Project

Referencing project's heat-maps, collision map and collision summaries provided in above, discuss the extent to which the proposed project limits represents one of the agency's top priorities for addressing ongoing safety and discuss how the proposed safety improvements correspond to the types and locations of the past collisions. (e.g. sidewalks, bike lanes, lighting, bulb-outs, signals/ barriers, etc.)

For Projects with Non-Infrastructure elements (Combined I/NI projects):

As appropriate, describe how the NI program elements:

- · educates bicyclists, pedestrians, and/or drivers about safety hazards for pedestrians and bicyclists; and
- encourages safe behavior, including through enforcement.

7-Los Angeles County Metropolitan Transportation Authority-1 Doran Street Grade Separation Active Transportation Access Project

Part B: Narrative Questions

Question #4

QUESTION #4

PUBLIC PARTICIPATION and PLANNING (0-10 POINTS)

Describe the community based public participation process that culminated in the project.

A. What is/was the process of defining future policies, goals, investments and designs to prepare for future needs of users of this project? How did the applicant analyze the wide range of alternatives and impacts on the transportation system to influence beneficial outcomes? (3 points max) (Max of 200 words) Words Remaining: 14

The project started with an alternatives analysis (AA) phase for the Doran Street and Broadway-Brazil Grade Separation Project that developed three main alternatives in addition to a no-build alternative. These alternatives were explored in a project study report that compared them in terms of costs, ability to close the two at-grade rail crossings, and traffic impacts.

To inform the public about the Doran Street and Broadway-Brazil Grade Separation Project and to solicit feedback, public meetings were scheduled in the disadvantaged communities where the project would be built. The meetings were held at both 3-4:30pm and 6:30-8:00 to account for the different schedules of employees and residents. 1,500-2,000 residents were mailed about the meetings. Emails were sent out to those who had signed up to receive information about the project. Public meetings were attended by 60-90 individuals.

The Board of Directors approved the Project Study Report and the support for Alternative 2 in June 2015. Further project development has occurred and there have been further rounds of meetings held in the community to discuss issues of the interim improvements and active transportation improvements in 2016 and 2017.

B. Who: Describe who was/will be engaged in the identification and development of this project and how they were engaged. Describe and provide documentation of the type, extent, and duration of outreach and engagement conducted to relevant stakeholders. (3 points max) (Max of 150 words) Words Remaining: |12

For the AA outreach, in addition to the two rounds of community meetings (an afternoon session held at an industrial site within Atwater Village and an evening session held at the Environmental Management Center on Flower Street in the City of Glendale), the project team met with a homeowner's association, the local walking and biking advocacy group (Walk Bike Glendale), and the neighborhood council for Atwater Village. Meeting participants listened to a presentation and were then given an opportunity to ask questions and provide comments. A Facebook page was also started for the project that provided information about upcoming public consultation activities (https://www.facebook.com/pg/DoranStreet/photos/?ref=page_internal) and currently has 73 followers. The focus of the project initially was on the overall plan and identification of a locally preferred alternative, and the focus more recently has been on the active transportation components.

C. What: Describe the feedback received during the stakeholder engagement process and describe how the public participation and planning process has improved the project's overall effectiveness at meeting the purpose and goals of the ATP, (2 points max) (Max of 200 words)

Strong feedback was received about the need to replace the Doran Street access point, and so the concept of the active transportation bridges was developed. The public also brought up issues of emergency service access to Atwater Village, and possibly combining that with the River Walk Bridge. When considering biking and pedestrian issues, the impact of certain alternatives on walking distances was considered.

D. Describe how stakeholders will continue to be engaged in the implementation of the project. (1 point max) (Max of 150 words)

Metro believes in a full context sensitive solution approach to this project. The team will fully engage residents, businesses, elected officials and other stakeholders and proactively provide project information and next steps in advance of milestone events. Permits and approvals will be required from the Cities of Glendale and Los Angeles before starting construction. Public opinion will continue to shape the active transportation elements of the project until completion, including details such as bridge aesthetics.

E. Is this project specifically listed in an approved Transportation Plan? (1 point max) (Max of 50 words)

Words Remaining: |35

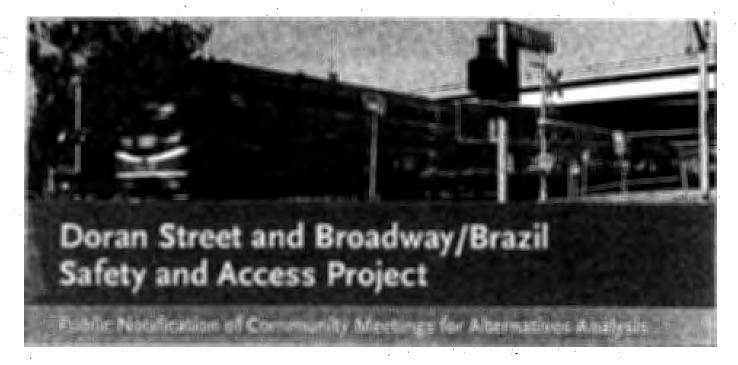

The Doran Street and Broadway-Brazil Grade Separation Project is listed in the Regional Transportation Plan.

PROJECT LIST

SOUTHERN CALIFORNIA ASSOCIATION OF GOVERNMENTS

2016 RTPSCS

APPENDIX
ADOPTED | APRIL 2016

Community Meetings Set for Doran Street and Broadway/Brazil Safety and Access Project

Metro invites you to attend the second round of community meetings that are being held on December 9, 2014 in Atwater Village and the City of Glendale.

Since the valuable community input offered at the first set of community meetings held in February 2014, the project team has been working to complete the technical evaluation of a range of alternatives. Please plan to attend one of the two community meetings listed below to learn about the draft Alternatives Analysis findings.

At these community meetings you will be able to:

- > Gain an understanding of the California Public Utilities Commission (CPUC) order instituting interim improvements for the Doran Street at-grade crossing
- > Find out about the refined grade separation alternatives that are being considered for further evaluation in the environmental document
- > Provide input on the refined alternatives
- > Talk one-on-one with the project experts

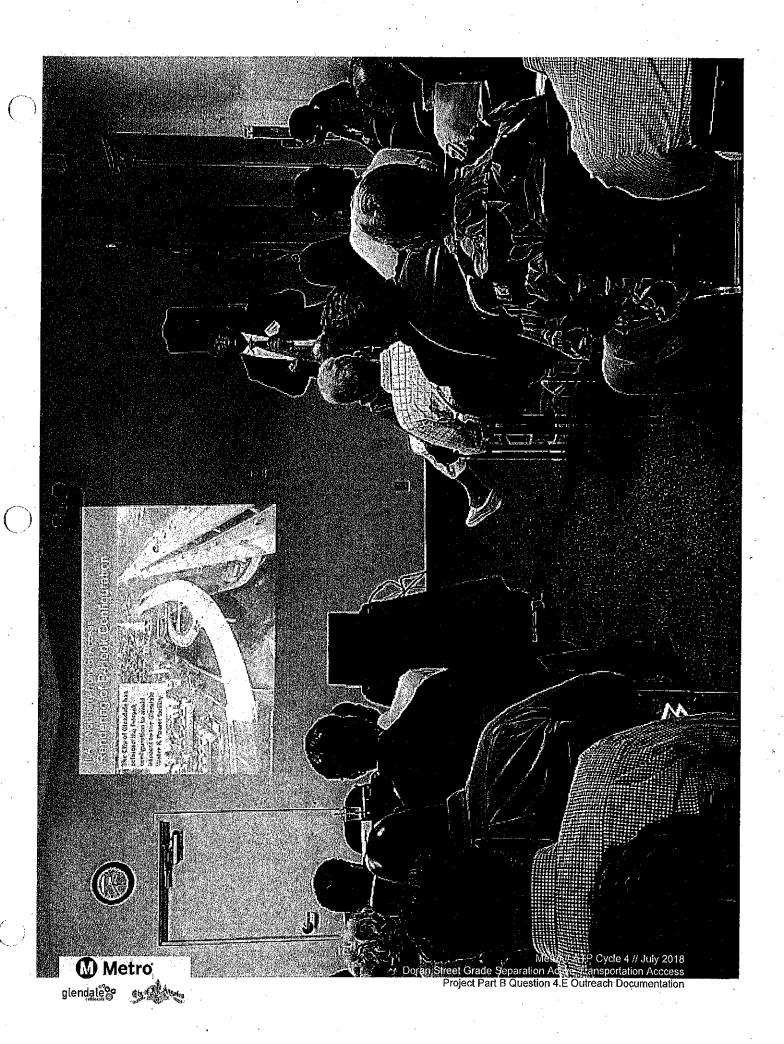

Two community meetings are being offered on **December 9th** at different times and locations to accommodate participation from all stakeholders, including businesses and residents. Please join us at the meeting that works best for you:

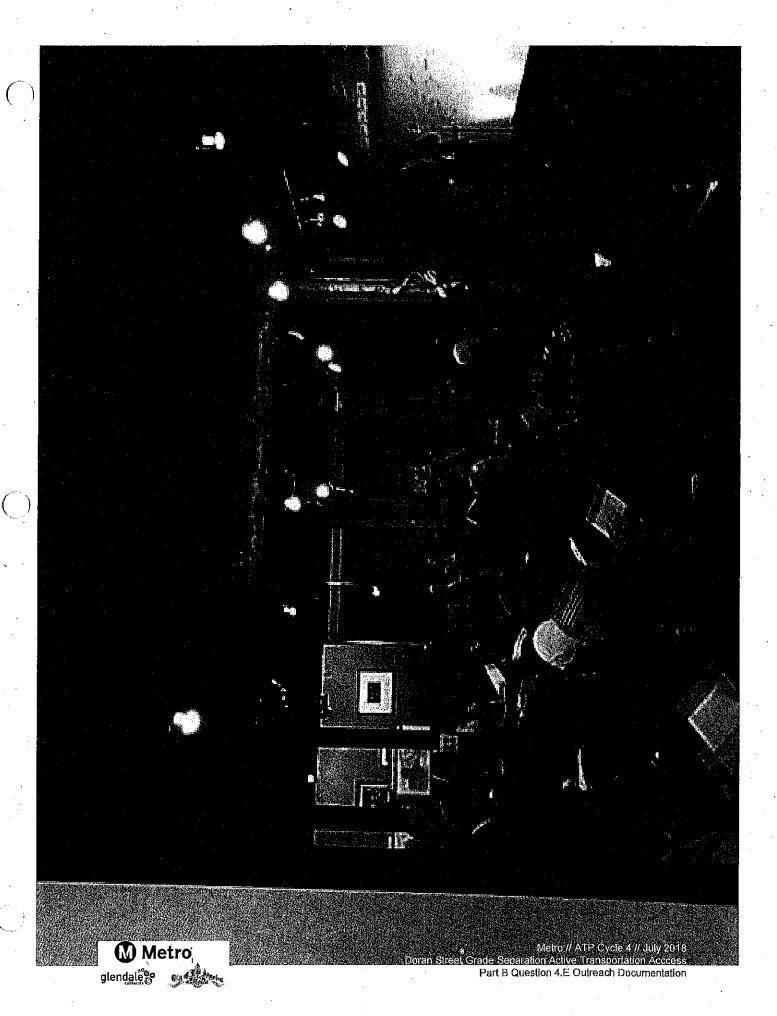

Atwater Village 3:00pm – 4:30pm 4520 Cutter Street (Located near Golden Road Brewing) Los Angeles, CA 90039

Glendale
6:30pm – 8:00pm
Environmental Management Center
780 Flower Street
Glendale, CA 91201

The public is welcome to participate at either of the community meetings, however, one of the workshops is being held during business hours (afternoon) to accommodate participation from local businesses and the other workshop is being held in the evening hours for all other community stakeholders. Both workshops will feature identical presentations.

LAPG 22-U (NEW 05/2018) v1.3

7-Los Angeles County Metropolitan Transportation Authority-1 Doran Sheet Grade Separation Active Transportation Access Project

Part B: Narrative Questions

Question #5

CONTEXT SENSITIVE BIKEWAYS/WALKWAYS and INNOVATIVE PROJECT ELEMENTS (0-5 POINTS)

A. How are the "recognized best" solutions employed in this project appropriate to maximize user comfort and for the local community context?

As you address this question consider the following:

- The posted speed limits and actual speed
- The existing and future motorized and non-motorized traffic volume
- The widths for each facility
- The adjacent land use, and
- How the project is advancing a low(er) stress environment on each facility or a low stress network
 - o What is the current stress level? (low, medium, or high?
 - o If the stress level is medium or high, is the project going beyond minimum design standards to maximize potential users of all ages and abilities?

(Max of 500 words)

Words Remaining: 217

This project recognizes that train speeds and volumes will increase over time, based on projections by Metro in conjunction with Metrolink and the California High Speed Rail Authority, making the at-grade crossing increasingly inadequate for non-motorized users. Train speeds are currently as high as 90 mph, and there may be pressure to increase speeds for high speed rail service. There are currently up to 90 trains traveling through this area per day, and this number is expected to increase to 135 trains per hour in the future. The project also recognizes that travel by bicycle or on foot along San Fernando Road, the alternative route to the Los Angeles River if the River Access Bridge is not built, is stressful, given its lack of bicycle lanes and incomplete sidewalk infrastructure. To encourage recreational and commuter biking and walking trips both to and from the northern part of Atwater Village, the new crossing has to provide a direct link, but also allow individuals to move at their own speed and with plenty of buffer between them and motorized vehicles, as it will have to accommodate a range of users, from confident cyclists to inexperienced cyclists. The River Access Bridge provides these characteristics. Class 1 facilities, which the bridges will be, are the recognized best solution for infrastructure through inhospitable pedestrian and cycling environments such as the ones in the project area.

This project also recognizes that the demand for bicycling and walking along the Los Angeles River will increase with the construction of access points and additional amenities, and so the paths will be built to allow for growth in usage and sufficient width for two-way travel, passing, and a range of travel speeds.

Innovative Project Elements

Does this project propose any solutions that are new to their region? Were any innovative elements considered, but not selected? Explain why they were not selected. (Max of 500 words) Words Remaining: 139

The innovation for this project comes through the development of solutions that address the complexities of the existing built environment. The solution for the River Walk Bridge had to integrate the bridge into Confluence Park (under construction), minimize the footprint within the Verdugo Wash, avoid the City of Glendale sewer lift station and locate the trail clear of the SR-134 bridge columns.

The bridge that is preferred is a prefabricated steel structure, a cost-effective solution that provides several benefits:

- It allows for longer spans which reduces the number of columns required within the Verdugo Wash.
- The prefabricated structure is built off-site, concurrent with the foundation construction, significantly reducing the construction duration
- The pre-fabricated structure can be lifted in place during a single work day
- The construction windows within the Verdugo Wash are seasonal, and the preferred structure allows the bridge to be built in a single season

This structure type is economical and the accelerated construction methodology will reduce the project schedule a minimum of six months, further reducing construction costs related to mobilization, demobilization and time related overhead.

Similarly, the River Access Bridge will utilize a prefabricated steel truss bridge. There will be two spans, one over San Fernando Road, the second over the SCRRA railroad corridor. The prefabricated structure will reduce the construction duration at this location and will allow for uninterrupted service, other than an overnight closure to place the steel truss bridge in place.

This is critical due to the limited work windows allowed in the rail corridor and reduces impact to the heavily traveled San Fernando Road. This is a significant benefit to the rail and vehicular commuters, reduces the efforts by the contractor in terms of falsework, railroad flagging, and extended traffic control measures.

LAPG 22-U (NEW 05/2018)

7-Los Angeles County Metropolitan Transportation Authority-1 Doran Street Grade Separation Active Transportation Access Project

Part B: Narrative Questions

Question #6

TRANSFORMATIVE PROJECTS (0-5 POINTS)

A. Describe how your project will transform the non-motorized environment? (Max of 500 words)

Words Remaining: 255

This project will transform the non-motorized environment near North Atwater Village in a number of ways. Most noticeably, conflict points with trains will be eliminated and non-motorized users will have an exclusive points of access. Without an at-grade rail crossing, cyclists and pedestrians will not have to wait for train. Nor will they have to share constrained access points to North Atwater Village with motorized vehicles, as they do today at Doran Street. Instead, pedestrians and cyclists will have an exclusive points of access at Doran Street and across the Verdugo Wash, while motorists will have to take less direct routes using either the future Fairmont Connector or the Salem-Sperry Bridge. By giving active transportation users this level of accommodation and convenience, biking and walking will be encouraged and driving will be discouraged for local trips.

With the River Walk Bridge and River Access Bridge, it is expected that this will increase the popularity of cycling and walking in the community, as certain parks and vistas will only be accessible by foot or on bicycle, such as the proposed Confluence Park. The collection of projects along the Los Angeles River, including bridges, parks, and trails, will transform an area that is now largely industrial into one that is increasingly recreational. It will likely bring many local residents from the surrounding disadvantaged communities to the Los Angeles River, when in the past they would never have considered going there or had a reason to do so.

B. Describe how other new or proposed funded projects or policies in the vicinity of this project will attribute to the transformative nature of this project?

As you address this question consider items like the following:

- Transit
- Land Use
- Overall non-motorized network

For projects please attach one of the following:

- The meeting minutes voting to fund the project, or
- The approved environmental document,
- Other important documentation demonstrating the transformation

(Max of 500 words)

Words Remaining:

With these two new bridges and other facilities being build through the Glendale Narrows Riverwalk Project, the LA River Revitalization Project, and other location project that include bridges across the Los Angeles River, closing gaps in the existing trail LA River Bike Path, and pathways through restored habitat areas, the river will be opened up for recreation and transportation use for 51 miles. Bicyclists and pedestrians will eventually be able to cross the Los Angeles River to get to Griffith Park, which is close in distance but currently inaccessible on foot or bicycle from the project area.

Attached is the motion to approve the Glendale Narrows Riverwalk Project Phases II and III, known as the "Jewel in the Bend" project,

ATP CYCLE 4 APPLICATION FORM

LAPG 22-U (NEW 05/2018)

7-Los Angeles County Metropolitan Transportation Authority-1 Doran Street Grade Separation Active Transportation Access Project

Part B: Narrative Questions

Question #7

COST EFFECTIVENESS (0-5 POINTS)

A project's cost effectiveness is considered to be the relative costs of the project in comparison to the project's benefits as defined by the purpose and goals of the ATP. This includes the consideration of the safety and mobility benefit in relation to both the total project cost and the funds provided.

Explain why this project is the best use of State Resources. (5 points max.) (Max of 250 words)

Words Remaining: 23

The strongest aspect of this project for a cost benefit analysis is the lives that will be saved with by River Access Bridge that eliminates conflicts between motorized vehicles and active transportation users. The at-grade rail crossing at Doran Street is currently considered the second most dangerous at-grade crossing in the state by the California Public Utilities Commission and there is a history of collisions involving bicycles and pedestrians on San Fernando Road (See Part B Question 3).

The River Walk Bridge will significantly increase mobility in the area by overcoming the double barrier of the Verdugo Wash and SR-134. Both bridges help build out a high-quality active transportation network that serves various destinations and offers an attractive alternative to automobile use, thereby increasing active transportation trips.

This project will leverage funding from Measure R (local sales tax), which is paying for the pre-construction and right-of-way elements. State funds are only being requested for construction funds.

Both bridges are using a prefabricated steel structure which allows for longer spans that reduce the number of foundations needed. Additionally, the steel structure can be placed within a single work shift, mitigating seasonal work restrictions within the Verdugo Wash, commuter rail delays, and extended traffic control measures on San Fernando Road. All these factors result in lower project costs for mobilization, demobilization, foundations, maintenance of traffic and time related overhead.

7-Los Angeles County Metropolitan Transportation Authority-1 Doran Street Grade Separation Active Transportation Access Project

Part B: Narrative Questions

Question #9

QUESTION #9 SCOPE AND PLAN CONSISTENCY (0 - 2 points)

A. The application, scope and plans are consistent with one another: (2 points max)

The scope and plans are consistent with one another including:

- Improvement location(s)
- Improvement elements(s)

Hi Cordelia,

Thank you for reaching out to the California Conservation Corps. Duane Wilson, District Director for our Pomona/LA District has indicated that it's not feasible for the CCC to participate in this project. Please include this email with your application as proof that you reached out to the California Conservation Corps.

Thanks,

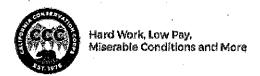

JULIE WOLSEY

Re: ATP Metro / Doran Street Monday, July 23, 2018 12:06:29 AM

Hello Cordelia,

Bo Savage of the Los Angeles Conservation Corps has responded that they are able to assist with the Doran Street and Broadway-Brazil Grade Separation Project if it receives funding. Please include this email with your application as proof that you reached out to the Local Conservation Corps.

The LA Corps would like to partner on the landscaping portion of this project.

Additionally, feel free to email Bo (<u>bsavage@lacorps.org</u>) directly if your project receives funding.

On Mon, Jul 16, 2018 at 10:21 PM, Crockett, Cordelia < Cordelia. Crockett@stantec.com > wrote:

To the California Conservation Corps (CCC) (Attn: Wei Hsieh) and California Association of Local Conservation Corps (LCC) (Attn: Dominique Lofton),

Metro is seeking ATP funding for its Doran Street and Broadway-Brazil Grade Separation Project - Active Transportation Access. As such, they would like to know whether your organizations would be available to participate in the project. Could to you please respond to this email and let me know whether your organization can participate, and if so, what tasks (shown in the Detailed Estimate) you'd be able to undertake?

The following is information about the project to help with your assessment.

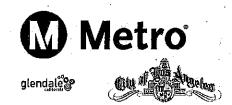

Project Title: Doran Street and Broadway-Brazil Grade Separation Project - Active Transportation Access

Project Description: This project will construct two bridges for shared use by pedestrians and cyclists to facilitate safe movements across waterways, railroad tracks, and heavily used roads.

Detailed Estimate: see attachment

Project Schedule: see attachment

Project Map: see attachment

ATP Engineer's Checklist for Infrastructure Projects

Required for "Infrastructure" applications ONLY

This application checklist is to be used by the engineer in "responsible charge" of the preparation of this ATP application to ensure all of the primary elements of the application are included as necessary to meet the CTC's requirements for a PSR-Equivalent document (per CTC's ATP Guidelines and CTC's Adoption of PSR Guidelines - Resolution G-99-33) and to ensure the application is free of critical errors and omissions; allowing the application to be accurately ranked in the statewide and regional ATP selection processes.

Special Considerations for Engineers before they Sign and Stamp this document attesting to the accuracy of the application:

Chapter 7; Article 3; Section 6735 of the Professional Engineer's Act of the State of California requires engineering calculation(s) or report(s) be either prepared by ar under the responsible charge of a licensed civil engineer. Since the corresponding ATP Infrastructure-application defines the scope of work of a future civil construction project and requires camplex engineering principles and calculations which are based on the best data available at the time of the application, the application must be signed and stamped by a licensed civil engineer.

By signing and stamping this document, the engineer is attesting to this application's technical information and engineering data upon which local agency's recommendations, conclusions, and decisions are made. This action is governed by the Professional Engineer's Act and the corresponding Code of Professional Conduct, under Sections 6775 and 6735.

The following checklist is to be completed by the engineer in "responsible charge" of defining the project's Scope, Cost and Schedule per the expectations of the CTC's PSR Equivalent. The checklist is expected to be used during the preparation of the documents, but not initialed and stamped by the engineer until the final application and application attachments are complete and ready for submission to Caltrans.

1. Vicinity map /Location map

Engineer's Initials:

a. The project limits must be clearly depicted in relationship to the overall agency boundary

2. Project layout-plan/map showing existing and proposed conditions must: Engineer's Initials:

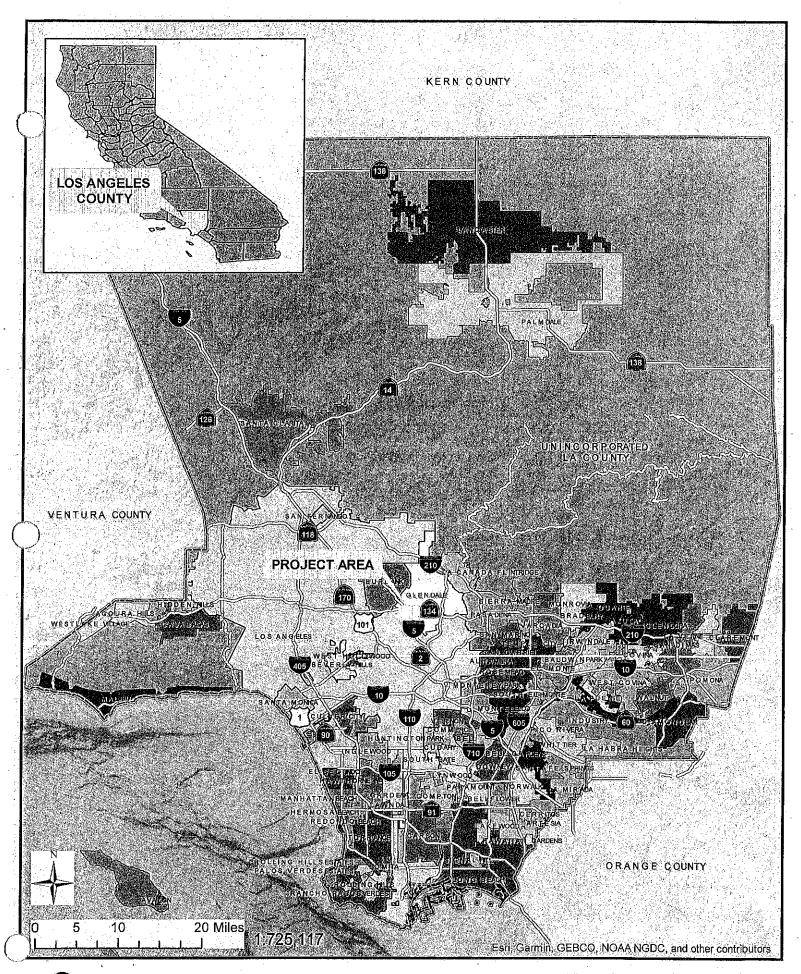

- a. Be to a scale which allows the visual verification of the overall project "construction" limits and limits of each primary element of the project. Scale must be shown on the plan/map
- b. Show the full scope of the proposed project, including any non-participating construction items
- c. Show all changes to existing motorized/non-motorized lane and shoulder widths. Label the proposed widths
- d. Show agency's right of way (ROW) lines when permanent or temporary ROW impacts are possible. (As appropriate, also show Caltrans', Railroad, and all other government agencies ROW lines)
- 3. **Typical cross-section(s)** showing existing and proposed conditions. **Engineer's Initials:** (Include cross-section for each controlling configuration that varies significantly from the typical)
 - a. Show and dimension: changes in lane widths, ROW lines, side slopes, etc.

4. Detailed Engineer's Estimate

Engineer's Initials:

- The Caltrans Project Estimate (Attachment F) must be filled out per the instructions and attached to the
 application, in the appropriate location.
- Each of the main project elements are broken out into separate construction items. The costs for each item are based on calculated quantities and appropriate corresponding unit costs
- c. All non-participating costs in relation to the ATP funding are clearly identified and accounted for separately from the eligible costs. The non-participating (or ineligible) costs must be consistent with Caltrans guidelines as shown in Local Assistance Program Guidelines chapter 22.6
- d. All project elements the applicant intends to utilize the CCC, certified community conservation corps, or tribal corps on need to be clearly identified and accounted for
- e. All project development costs to be funded by the ATP need to be accounted for in the total project cost

Item Number(s)

The Engineer's logic and/or calculations for splitting costs between ATP-Eligible and Non-participating costs must be documented in this section of the Estimate form.

Separate logic is required for each construction item listed above which is partly included for ATP fluiding or is required for the construction of an included item/element of the project.

Description of Engineer's Logic: (See examples shown in the Instructions)

Director, California Department of Transportation
1120 N Street, MS-49
Sacramento, CA 95814

Subject: Letter of Support for Doran Street and Broadway/Brazil Grade Separation Project – Application for Active Transportation Program (ATP) Cycle 4

Dear Ms. Berman:

It is my privilege to write this letter of support for the Doran Street and Broadway/Brazil Grade Separation Project (Active Transportation Access) application under the Active Transportation Program (ATP) Cycle 4. This project will advance the safety measures at one of the most dangerous, at-grade rail crossings in California while connecting the City of Glendale and LA residents to the LA River to enjoy the natural environment.

Metro's effort to construct the River Access and River Walk active transportation bridges in a local disadvantaged community is necessitated by the planned closing of Doran Street at-grade crossing which will also cut off the Glendale community from the North Atwater Village area. The River Access Bridge will replace the east/west active transportation connection lost by the at-grade crossing closing and provide a necessary connection to the natural amenities along the Los Angeles River, and the River Walk Bridge will cover the north/south link to North Atwater via the new bicycle and pedestrian facilitates being constructed to the north of Verdugo Wash and planned to the south of the project limits.

Improving pedestrian and bicyclist safety is a high priority for the City of Glendale and we have recently rolled out the "Be Street Smart" education initiative; thus, supporting this project because it will provide a safe pedestrian and bicycle crossing for residents as it provides a separation from active railroad tracks. Additionally, this project connects to the City of Glendale's project, the Glendale Narrows Riverwalk Project (Phase II) which will construct two parks, the Flower Plaza Park — adjacent to the intersection of Flower Street and Fairmont Avenue, this park will connect the recently completed Class I Bike Paths to the north and south and includes a small bridge over a flood control box culvert. As well as Confluence Park — at the confluence of the Los Angeles River and the Verdugo Wash, adjacent to the 134 Freeway. The quality of life of Glendale residents will be greatly improved when the Riverwalk Bridge included in this application is completed.

I humbly request that you give favorable consideration to this funding application, which will allow Metro and partners to work towards the goals of safe and sustainable active transportation throughout the region. If you have any questions, please do not hesitate to contact my assistant, Hourik Hayrapetian:
HHayrapetian@glendaleca.gov">HHayrapetian@glendaleca.gov or via telephone 818-548-4844.

Sincerely,

Jul home

Zareh Sinanyan Mayor, City of Glendale

MITCH O'FARRELL

Councilmember 13th District

Subject: Letter of Support for Doran Street and Broadway/Brazil Grade Separation Project – Application for Active Transportation Program (ATP) Cycle 4

Dear Ms. Berman:

On behalf of Council District 13 in the City of Los Angeles, I am pleased to submit this letter of support for the **Doran Street and Broadway/Brazil Grade Separation Project (Active Transportation Access)** application under the Active Transportation Program (ATP) Cycle 4. The proposed project will improve safety at one of the most dangerous at-grade rail crossings in California while connecting City of LA and Glendale residents to the Los Angeles River to enjoy the natural environment.

Metro's effort to construct the River Access and River Walk active transportation bridges in a local disadvantaged community is necessitated by the planned closing of Doran Street at-grade crossing which will also cut off the Glendale community from the North Atwater Village area. The River Access Bridge will replace the east/west active transportation connection lost by the at-grade crossing closing and provide a necessary connection to the natural amenities along the Los Angeles River, and the River Walk Bridge will cover the north/south link to North Atwater via the new bicycle and pedestrian facilitates being constructed to the north of Verdugo Wash and planned to the south of the project limits.

I respectfully request that you give favorable consideration to this funding application, which will allow Metro and partners to work towards the goals of safe and sustainable active transportation throughout the region. If you have any questions, please do not hesitate to contact Christine Peters in my office, Christing Deters@labity.org, 213-473-7013.

Sincerely,

MITCH O'FARRELL Councilmember 13th District

Mitel O'Donnel

The City supports this project because it will provide a safe pedestrian and bicycle crossing for residents as it provides a separation from active railroad tracks. Additionally, this project complements the City of Los Angeles effort to revitalize the Los Angeles River, and improves the quality of life of residents by enhancing the regional 51-mile connected corridor being realized along the river's course, which is identified as a priority project to complete in time for the 2028 Olympic and Paralympic games.

I respectfully request that you give favorable consideration to this funding application, which will allow MTA, the City of Los Angeles, and other partners to work toward the goals of safe, sustainable, active transportation in and between communities.

Please note that as an elected official, under California law, I am required to report "behested payments", such as a letter of support on behalf of an organization seeking grant funds from a government or non-profit entity. To allow us to comply with our reporting requirements, we ask that the grantee provide us with certain information if awarded, and upon receipt of, the grant if in excess of \$5,000. Specifically, we need to know the date the grantee received the funds, the amount of the grant, and the time period covered. The information may be sent via email to Daniel Rodman at Daniel.Rodman@lacity.org.

Sincerely,

ERIC GARCETTI

Mayor

The alternative transportation bridges in this project will complement existing and planned projects that are part of efforts to revitalize the Los Angeles River.

We urge you to fund this project, which will improve safety and quality of life for the communities of Glendale, Los Angeles, and Los Angeles County.

Sincerely,

Tori Kjer

Los Angeles Program Director The Trust for Public Land

Angeles will be greatly improved when the Riverwalk Bridge included in the application is completed. Additionally, the project complements the City of Los Angeles effort to revitalize the LA River and improve the quality of life of residents in the region.

I respectfully request that you give favorable consideration to this funding application, which will allow Glendale Parks & Open Space Foundation meet its vision of getting Glendale residents outdoors. If you have any questions, please do not hesitate to contact me at (323) 304-1573 or kate@glendaleparksfoundation.org.

Sincerely,

Kate Eberle

Chair, Board of Directors
