Inyo County	New	23/24	Road Maintenance & Rehabilitation	Project #43 - Storm & Snowmelt Runoff Road Rehabilitation Project	This project will include: Pavement Rehab/Repair (Existing)   Several roads in Inyo County were heavily damaged as a result of the 2022-2023 storm cycle when back-to-back atmospheric rivers resulted in severe erosion of both paved areas and shoulders within the right-of-way. Additionally, the snow pack in the southern High Sierras is currently at 442% as of May 12th, 2023. This snow pack will eventually result in more flooding and damage to roads and bridges as ambient nighttime temperatures stay above 32 degrees.   The work to be performed under this project involves the importation of structural fill material to be placed and compacted in the areas where erosion took place within the right-of-way. It also involves the removal of damaged asphalt paving, the restoration of the Type II Class B base material, and the replacement of any asphalt paving that was lost as a result of the erosion. Also included in this work is the replacement of damaged or undersize culverts and headwalls or flares, striping, etc.	The road damage is distributed county-wide, but the roads with the greatest damage to date are Whitney Portal Road and Old Sherwin Grade Road. We are currently assessing all of the roads in Inyo County to arrive at a more concise damage estimate.	Construction	07/2023	06/2024	5-5	8	8
