Re: CalTrans’ Last Chance Grade Project

Dear Ms. Inman:

On behalf of the Elk Valley Rancheria, California, a federally recognized Indian tribe, I write in strong support of the California Department of Transportation’s (CalTrans) request for $40 million to fully fund the Project Approval and Environmental Document phase of the Last Chance Grade project on U.S. Highway 101 between Klamath and Crescent City. This funding will augment $10 million programmed to perform preliminary geotechnical and environmental studies. CalTrans has made good use of preliminary funding to advance the project. The first of three phases of geotechnical studies is complete and environmental studies are beginning this summer. Full funding will ensure the coastal highway does not experience a major failure or require continuation of the constant maintenance of the past several decades.

Over the last twenty years, $86M has been spent in maintenance and repairs at Last Chance Grade and these costs have accelerated. A total of $56 million from the federal emergency relief program has been spent since 2010. These storm damage repair projects are considered temporary due to the deep-seated nature of the landslide.

A significant failure at Last Chance Grade would force a detour of approximately 320 miles — about six to eight hours. According to a 2018 economic study, a full closure would cost the regional economy an estimated $456 million per year in business output, $417 million in higher travel expenses, and 3,800 jobs. The Elk Valley Rancheria, California is part of the Last Chance Grade Stakeholders group convened by Congressman Jared Huffman, D-San Rafael, which is made up of representatives of county governments, tribes, environmental groups, landowners, business and transportation interests that agree a new alignment is necessary. CalTrans is also working closely with resource and permitting agencies and tribes to address environmental and cultural concerns in advance.
The funding under consideration would allow CalTrans to complete the Project Approval and Environmental Document phase of the Last Chance Grade project to protect the safety and economy of Del Norte County and the people and commerce that travel U.S. Highway 101. Please give this funding your full and fair consideration.

Sincerely,

[Signature]

Dale A. Miller
Chairman

cc: Elk Valley Tribal Council

Dear Ms. Inman:

I am writing in strong support of the California Department of Transportation's (Caltrans') request for $40 million to fully fund the Project Approval and Environmental Document phase of the Last Chance Grade project on U.S. Highway 101 between Klamath and Crescent City. As you are aware, this funding will augment $10 million programmed to perform preliminary geotechnical and environmental studies. Caltrans has made good use of preliminary funding to advance the project quickly and efficiently in response to growing State and Federal concern with the possibility of this alignment. The first of three phases of geotechnical studies is complete and environmental studies are beginning this summer. Full funding will ensure our only north/south artery does not experience a major failure or require continuation of the constant maintenance.

Our Dairy relies on Highway 101 for movement of our milk and eggs on a daily basis to the Bay Area. With over $150,000 a week in raw and packaged goods being transported, and the continuously shrinking Dairy economy, we do not have the ability to weather a highway failure that would divert our vehicles 320 miles.

Over the last 20 years, $86M has been spent in maintenance and repairs at Last Chance Grade and these costs have accelerated. A total of $56 million from the federal emergency relief program has been spent since 2010. These storm damage repair projects are considered temporary due to the deep-seated nature of the landslide. As I write this letter, US Highway 101 – our lifeline – is closed at Last Chance Grade due to a landslide. Caltrans Region 1 has pull forward another $2.5 Million out of their SHOP budget just to keep this section open with a full-time contractor on site 24/7, dollars that are necessary to keep our commercial lifeline open.

As you are aware, a significant failure at Last Chance Grade would force a detour of approximately 320 miles – about six to eight detours for our trucks hauling milk, eggs and cattle. According to a 2018 economic study, a full closure would cost the regional economy an estimated $456 million per year in business output, $417 million in higher travel expenses, and 3,800 jobs.

The CTC funding under consideration would allow Caltrans to complete the Project Approval and Environmental Document phase of the Last Chance Grade project to protect the safety and economy of Del Norte County and our Dairy operation which supports over 125 jobs in our community. Thank you for your full and fair consideration of this funding request.

Sincerely,

Blake Alexandre
Alexandre Family Farm
Dear Ms. Inman:

The Friends of Del Norte (FODN) strongly supports the California Department of Transportation’s (Caltrans’) request for $40 million to fully fund the Project Approval and Environmental Document phase of the Last Chance Grade project on U.S. Highway 101 between Klamath and Crescent City. It is essential to have a thoughtful well planned project within an area of world renowned ecological value, our old growth Redwood Coastal forest. FODN is part of the Last Chance Grade Stakeholders group convened by Congressman Jared Huffman, D-San Rafael, which is made up of representatives of county governments, tribes, environmental groups, landowners, business and transportation interests that agree a new alignment is necessary. Caltrans is also working closely with resource and permitting agencies and tribes to address environmental and cultural concerns in advance.

This funding will augment $10 million programmed to perform preliminary geotechnical and environmental studies. Caltrans has made good use of preliminary funding to advance the project. The first of three phases of geotechnical studies is complete and environmental studies are beginning this summer. Full funding will ensure the coastal highway does not experience a major failure or require continuation of the constant maintenance of the past several decades.

Over the last 20 years, $86M has been spent in maintenance and repairs at Last Chance Grade and these costs have accelerated. A total of $56 million from the federal emergency relief program has been spent since 2010. These storm damage repair projects are considered temporary due to the deep-seated nature of the landslide.

A significant failure at Last Chance Grade would force a detour of approximately 320 miles – about six to eight hours. According to a 2018 economic study, a full closure would cost the regional economy an estimated $456 million per year in business output, $417 million in higher travel expenses, and 3,800 jobs.

The CTC funding under consideration would allow Caltrans to complete the Project Approval and Environmental Document phase of the Last Chance Grade project to protect the safety and economy of Del Norte County and to provide a solution that will best conserve the magnificent ecology of our region. Please give this funding your full and fair consideration.

Sincerely, Eileen Cooper, vice president, on behalf of the FODN board and membership
March 3, 2019

Dear California Transportation Commission.  

I'm writing to request that the California Transportation Commission approve CalTrans' request for forty million dollars in funding to study the environmental parameters for alternative routes and repair scenarios for Highway 101 at Last Chance Grade.

Even as I write this letter, Last Chance Grade is one way traffic only after another slide occurred due to the recent strong rains both in rainfall per day, and length of days the storm moved over us. I am fortunate that I didn't have need of leaving the area. My husband, however, chose to leave via Hwy 199 rather than risk further slide on Hwy 101. He cut back over to the Hwy 101 South going into Santa Maria (his ultimate destination was Ventura).

Del Norte County needs Hwy 101 to be accessible and open year round. Our livelihoods, our food supplies, our economies depend on the moving of people and products up and down the 101. The funding you provide will be put to good use studying geotechnical and environmental issues relating to the present alignment of the highway and alternative routes that may prove more secure and require less on-going maintenance.

I thank you in advance for considering this request and I hope that you will see fit to approve the request. Thank you from Crescent City.

Sincerely,

Janet Gilbert

Dear Ms. Inman:

My name is Baird Rumiano and I am the President, and third-generation owner of Rumiano Cheese Company, a family-owned business headquartered in California since 1919. Our manufacturing facility is in Crescent City, and Last Chance Grade is vital artery to much of our milk supply coming from Humboldt County. Rumiano Cheese Company has been producing internationally award-winning cheese for 100 years, and both the cheese company and the dairy producers need a reliable road between Crescent City and Humboldt County to maintain that tradition.

The economic impact of a landslide and road closure at Last Chance Grade would be catastrophic to both Humboldt County milk producers and Rumiano Cheese Co. The payroll for the milk produced in Humboldt County is $20,000,000 per year, while the payroll for the employees who manufacture the cheese in Crescent City is $2,300,000 for 42 employees. Without the use of highway 101 between Crescent City and Humboldt County both, the producers and the cheese company would go out of business.

I am writing in strong support of the California Department of Transportation’s (CTC) request for $40 million to fully fund the Project Approval and Environmental Document phase of the Last Chance Grade project on U.S. Highway 101 between Klamath and Crescent City. This funding will augment $10 million programmed to perform preliminary geotechnical and environmental studies. Caltrans has made good use of preliminary funding to advance the project. The first of three phases of geotechnical studies are complete and environmental studies are beginning this summer. Full funding will ensure the coastal highway does not experience a major failure or require continuation of the constant maintenance of the past several decades.

Over the last 20 years, $86M has been spent in maintenance and repairs at Last Chance Grade and these costs have accelerated. A total of $56 million from the federal emergency relief program has been spent since 2010. These storm damage repair projects are considered temporary due to the deep-seated nature of the landslide.

A significant failure at Last Chance Grade would force a detour of approximately 320 miles - about six to eight hours. According to a 2018 economic study, a full closure would cost the regional economy an estimated $456 million per year in business output, $417 million in higher travel expenses, and 3,300 jobs. My organization is part of the Last Chance Grade Stakeholders group convened by Congressman Jared Huffman, D-San Rafael, which is made up of representatives of County governments, tribes, environmental groups, landowners, business and transportation interests that agree a new alignment is necessary. Caltrans is also working closely with resource and permitting agencies and tribes to address environmental and cultural concerns in advance.

The CTC funding under consideration would allow Caltrans to complete the Project Approval and Environmental Document phase of the Last Chance Grade project to protect the safety and economy of Del Norte County and the people and commerce that travels U.S. Highway 101. Please give this funding your full and fair consideration.

Sincerely,

Baird Rumiano  
President  
Rumiano Cheese Company

RE: LETTER OF SUPPORT FOR CTC TO APPROVE $40 MILLION FOR FUNDING FOR LAST CHANGE GRADE

Dear Sirs:

This letter is respectfully asking the California Transportation Commission (CTC) for $40 million to complete the environmental work needed for alternatives to Last Chance Grade, just south of Crescent City, CA, on Highway 101. The funding will augment $10 million programmed to perform preliminary geotechnical and environmental studies. Caltrans has made good use of preliminary funding to advance the project. The first of three phases of geotechnical studies is complete and environmental studies are beginning this summer. Full funding will ensure the coastal highway does not experience a major failure or require continuation of the constant maintenance of the past several decades.

A couple lost their lives several years ago when the road gave way to the sea when they were in their car traveling back from Eureka where they had delivered their student son to Humboldt State University. I own and operate a fine arts gallery in Crescent City and me, my, and other businesses, are dependent upon safe road travel on Highway 101, over Last Chance Grade. Please approve the $40 million funding for the necessary environmental work. Thank you for your consideration.

Sincerely yours,

Barbara Burke

Fran Inman  
Chair, California Transportation Commission  
1120 N Street, MS-52  
Sacramento, CA 95814  

Dear Ms. Inman:

I am writing in strong support of the California Department of Transportation’s (CTC) request for $40 million to fully fund the Project Approval and Environmental Document phase of the Last Chance Grade project on U.S. Highway 101 between Klamath and Crescent City. This funding will augment $10 million programmed to perform preliminary geotechnical and environmental studies. Caltrans has made good use of preliminary funding to advance the project. The first of three phases of geotechnical studies is complete and environmental studies are beginning this summer. Full funding will ensure the coastal highway does not experience a major failure or require continuation of the constant maintenance of the past several decades.

Over the last 20 years, $86M has been spent in maintenance and repairs at Last Chance Grade and these costs have accelerated. A total of $56 million from the federal emergency relief program has been spent since 2010. These storm damage repair projects are considered temporary due to the deep-seated nature of the landslide.

A significant failure at Last Chance Grade would force a detour of approximately 320 miles – about six to eight hours. According to a 2018 economic study, a full closure would cost the regional economy an estimated $456 million per year in business output, $417 million in higher travel expenses, and 3,800 jobs. My organization is part of the Last Chance Grade Stakeholders group convened by Congressman Jared Huffman, D-San Rafael, which is made up of representatives of county governments, tribes, environmental groups, landowners, business and transportation interests that agree a new alignment is necessary. Caltrans is also working closely with resource and permitting agencies and tribes to address environmental and cultural concerns in advance.

As a school district, we are responsible for the education of each of our students, including home to school transportation. We have one school in the Klamath area, Margaret Keating Elementary School, that serves grades TK-6. These students are some of the most at-risk and historically underserved in the state and transportation plays a large role in getting them to school, providing nutritious breakfast and lunch, and allowing extended learning opportunities. On February 25 & 26, our community felt, for a short time, the impact of a closure of Highway 101 at Last Chance
Grade. We were unable to provide transportation for students, which limited families’ abilities to get their children to school, to deliver hot food in a predictable, timely manner, and to provide transportation in any form to 7th-12th grade students, who rely predominantly on district transportation to attend middle and high school in Crescent City.

The CTC funding under consideration would allow Caltrans to complete the Project Approval and Environmental Document phase of the Last Chance Grade project to protect the safety and economy of Del Norte County and the people and commerce that travels U.S. Highway 101. Please give this funding your full and fair consideration.

Sincerely,

Francisco Magarino
President, Board of Trustees
Del Norte County Unified School District

Region 1 State Board Director
California School Boards Association
March 1, 2019

Fran Inman
Chair, California Transportation Commission
1120 N Street, MS-52
Sacramento, CA 95814

Dear Ms. Inman:

I am writing in strong support of the California Department of Transportation’s (CTC) request for $40 million to fully fund the Project Approval and Environmental Document phase of the Last Chance Grade project on U.S. Highway 101 between Klamath and Crescent City. This funding will augment $10 million programmed to perform preliminary geotechnical and environmental studies. Caltrans has made good use of preliminary funding to advance the project. The first of three phases of geotechnical studies is complete and environmental studies are beginning this summer. Full funding will ensure the coastal highway does not experience a major failure or require continuation of the constant maintenance of the past several decades.

Over the last 20 years, $86M has been spent in maintenance and repairs at Last Chance Grade and these costs have accelerated. A total of $56 million from the federal emergency relief program has been spent since 2010. These storm damage repair projects are considered temporary due to the deep-seated nature of the landslide.

A significant failure at Last Chance Grade would force a detour of approximately 320 miles – about six to eight hours. According to a 2018 economic study, a full closure would cost the regional economy an estimated $456 million per year in business output, $417 million in higher travel expenses, and 3,800 jobs. My organization is part of the Last Chance Grade Stakeholders group convened by Congressman Jared Huffman, D-San Rafael, which is made up of representatives of county governments, tribes, environmental groups, landowners, business and transportation interests that agree a new alignment is necessary. Caltrans is also working closely with resource and permitting agencies and tribes to address environmental and cultural concerns in advance.

As the Superintendent for Schools for the Del Norte County Office of Education, I would like to convey the extreme urgency of this project. Del Norte County has some of the State’s highest rates of child abuse, neglect, domestic violence, suicidal ideation, poverty, and homeless and foster youth. While the County Office of Education works closely with the District to ensure supports for each affected youth, the untenable situation at Last Chance Grade puts some of our most at-risk youth at great risk. Highway 101 is the only thoroughfare that allows access to the
community of Klamath from Crescent City, which is where my office and our support services are located. The only other institutional supports would be located in Humboldt County, which is more than an hour and half from the vicinity of the school. Food, medical, dental, mental health, and other services are also primarily provided in or near Crescent City, and the loss of access to those services due to the loss of access on Highway 101 would create a huge negative impact to the students and families of our county. Even as of now, some families are so concerned with the continued maintenance and recent failures of the grade, that they have placed their children at alternative schools, simply to avoid the daily commute to Crescent City.

The CTC funding under consideration would allow Caltrans to complete the Project Approval and Environmental Document phase of the Last Chance Grade project to protect the safety and economy of Del Norte County and the people and commerce that travels U.S. Highway 101. Please give this funding your full and fair consideration.

Sincerely,

Jeff Harris
Superintendent
Del Norte County Schools

Sacramento, CA 95814

Dear Ms. Inman:

I am writing in strong support of the California Department of Transportation’s (Caltrans’) request for $40 million to fully fund the Project Approval and Environmental Document phase of the Last Chance Grade project on U.S. Highway 101 between Klamath and Crescent City. This funding will augment $10 million programmed to perform preliminary geotechnical and environmental studies. Caltrans has made good use of preliminary funding to advance the project. The first of three phases of geotechnical studies is complete and environmental studies are beginning this summer. As I write this letter, US Highway 101, our lifeline, has been fully closed several times in the last 48 hours. Full funding will ensure the coastal highway does not experience a major failure or require continuation of the constant maintenance of the past several decades and days.

Over the last 20 years, $86 million has been spent in maintenance and repairs at Last Chance Grade and these costs have accelerated. A total of $56 million from the federal emergency relief program has been spent since 2010. These storm damage repair projects are considered temporary due to the deep-seated nature of the landslide.

A significant failure at Last Chance Grade would force a detour of approximately 320 miles—about six to eight hours. According to a 2018 economic study, a full closure would cost the regional economy an estimated $456 million per year in business output, $417 million in higher travel expenses, and 3,800 jobs. While this project will be a long time in the making, we need to begin.

The CTC funding under consideration would allow Caltrans to complete the Project Approval and Environmental Document phase of the Last Chance Grade project to protect the safety and economy of Del Norte County and the people and commerce that travels U.S. Highway 101. Please give this funding your full and fair consideration.

Cordially,

Tamera Leighton, Executive Director
Del Norte Local Transportation Commission

Dear Chair Inman,

We are writing to express our support of the California Department of Transportation's request for $40 million to completely fund the Project Approval and Environmental Document phase of the Last Chance Grade project on U.S. Highway 101 between Crescent City and Klamath.

The funding will supplement the $10 million programmed to perform preliminary geotechnical and environmental studies. Caltrans has prudently used preliminary funding in advancement of the project. The first of three phases of geotechnical studies is complete and environmental studies are beginning this summer. Full funding will ensure that U.S. Highway 101 along the Del Norte County coast does not experience a major failure or require continuation of the constant maintenance of the past decades.

Over the last 20 years, $86M has been spent in maintenance and repairs at Last Chance Grade and these costs have accelerated. A total of $56 million from the federal emergency relief program has been spent since 2010. These storm damage repair projects are considered temporary due to the deep-seated nature of the landslide.

A significant failure at Last Chance Grade would force a detour of approximately 320 miles — about six to eight hours. According to a 2018 economic study, a full closure would cost the regional economy an estimated $456 million per year in business output, $417 million in higher travel expenses, and 3,800 jobs. My organization is part of the Last Chance Grade Stakeholders group convened by Congressman Jared Huffman, D-San Rafael, which is made up of representatives of county governments, tribes, environmental groups, landowners, business and transportation interests that agree a new alignment is necessary. Caltrans is also working closely with resource and permitting agencies and tribes to address environmental and cultural concerns in advance.
The CTC funding under consideration would allow Caltrans to complete the Project Approval and Environmental Document phase of the Last Chance Grade project to protect the safety and economy of Del Norte County and the people and commerce that travels U.S. Highway 101. Please give this funding your full and fair consideration.

Re: Funding for Last Chance Grade

Dear Chair Inman:

I would like to express my support of the Caltrans request for $40 million to fully fund the Project Approval and Environmental Document (PA&ED) phase of the Last Chance Grade project on US 101 between Klamath and Crescent City. Full funding will ensure the coastal highway does not experience a major failure or require continuation of the constant and costly maintenance of the past several decades.

Expenditures of this magnitude may seem challenging to make in a rural area where fewer people are impacted than in urban areas. However, as a rural RTPA, we at MCOG understand just how critical this project is to the circulation and economic stability of the North Coast. If one route closes in a rural area, there are often no feasible alternate routes like there are in urban areas. A closure of US 101 at Last Chance Grade results in a detour of approximately 320 miles. According to a 2018 economic study, a full, long-term closure would cost the regional economy an estimated $456 million per year in business output, $417 million in higher travel expenses, and 3,800 jobs.

Since 2010, a total of $56 million from the federal emergency relief program has been spent on repairs of US 101 at Last Chance Grade. These storm damage repair projects are considered temporary due to the deep-seated nature of the landslide. Although a permanent solution may be a large undertaking, it will eliminate the need to continually fund short term fixes.

Completion of the PA&ED phase of this project will allow Caltrans to move toward a permanent solution to the ongoing landslide related closures of US 101 and protect the safety and economy of Del Norte County as well as the travelers and goods movement that rely on US 101. Please give this funding your full and fair consideration.

Sincerely,

[Signature]

Nephele S. Barrett

March 4, 2019

Fran Inman
Chair, California Transportation Commission
1120 N Street, MS-52
Sacramento, CA 95814

Dear Ms. Inman:

I am writing to support the California Department of Transportation’s (Caltrans) request for $40 million to complete environmental work on a potential long-term solution to Last Chance Grade on U.S. Highway 101, a crucial transportation project in my congressional district. Attached you will find letters from a variety of organizations, many of who are represented on my Last Chance Grade Stakeholders Group, which was convened in 2014. These letters signify unprecedented support for a project vital to the North Coast’s economy and the safety of the travelling public.

Over the last 20 years, $86 million has been spent in maintenance and repairs at Last Chance Grade, including $56 million from the federal emergency relief program since 2010. Caltrans has worked heroically to keep the route open, but serious problems persist. Highway failure at Last Chance Grade would force a detour of 320 miles and cost the regional economy about $456 million per year in business, $417 million in travel expenses, and 3,800 jobs.

Because of the severity of the problem, I formed a stakeholder group of county governments, tribes, environmental groups, landowners, business and transportation interests that agree a new alignment is necessary. Caltrans is also working closely with resource and permitting agencies and tribes to address environmental and cultural concerns in advance. These groups are closely analyzing options for a new alignment that carefully consider safety and impacts to natural and cultural resources.

The funding your commission is considering would allow Caltrans to complete the Project Approval and Environmental Document phase of the Last Chance Grade project to protect the safety and economy of Del Norte County and the people and commerce that travels U.S. Highway 101. Please give this funding your full and fair consideration.

Sincerely,

JARED HUFFMAN
